I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Pakistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that helps give a better picture of your situation. Since you're 16 and just finished primary school in Denmark (likely meaning **folkeskole** and its **9th or 10th grade**), this is a key point where you choose between different **youth education pathways**.

Here's a breakdown of your main options, based on the Danish system and your background:

## 🎓 1. Gymnasiale uddannelser (Upper Secondary Education – Academic Track)

If you're interested in going to **university or higher education** later, one of these could be right:

- **STX (Studentereksamen):** General upper secondary, with a wide range of subjects.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international relations.
- **HTX (Higher Technical Examination):** Focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination):** A 2-year academic course, often for those who didn't go directly from 9th grade.

### ✅ Recommended if:

- You like academic subjects
- You're considering university in Denmark or abroad
- You're unsure what to specialize in yet

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training – VET)

These are job-oriented and combine **school and apprenticeship**. You can become everything from an electrician to a healthcare worker, chef, or IT technician.

### ✅ Recommended if:

- You want to start working sooner
- You prefer hands-on learning
- You're interested in trades, technical work, or practical careers

You can even continue on to university if you take **EUX**, which combines vocational training with academic courses.

### 3. Other considerations based on your background

As someone with Pakistani roots and Danish upbringing, you might also think about:

- **Multilingual or intercultural skills** – useful for careers in international business, translation, teaching, or diplomacy.
- **Role model potential** – many young people with immigrant backgrounds go into education, healthcare, or social work to support communities.
- **Islamic studies, Urdu, or cultural areas** – if these interest you, you might explore them alongside your education.

### So, what would I recommend?

Here's how to choose:

Your interests/strengths	Suggested Path
You like reading, writing, broad subjects	<b>STX or HF</b>
You're into business or international work	<b>HHX</b>
Science, engineering, or IT appeal to you	<b>HTX</b>
You want a practical job soon	<b>VET (Erhvervsuddannelse)</b>
You're unsure and want time	<b>10th grade</b> or a <b>"efterskole"</b>

### Final tip:

**Talk to your school's guidance counselor (UU-vejleder)** – they can help you explore your options in more detail. Also, consider what **you enjoy doing**, not just what others around you might expect. You're at the start of a path that's yours to shape.

If you'd like, I can help you explore specific schools or programs near where you live in Denmark. Just tell me your region or town!
