

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps a lot. Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're at a very important crossroads. Let me give you a few clear paths based on the Danish system, and then some personal considerations depending on your interests and future goals.

1 General Upper Secondary Education (Gymnasiale uddannelser)

Examples:

- STX (Almen studentereksamen)
- HHX (Handelsskole studentereksamen)
- HTX (Teknisk studentereksamen)
- HF (Højere Forberedelseseksamen)

When to choose:

- If you want to keep your options open for university later.
- If you enjoy academic subjects (science, languages, business, or social studies).

Pros:

- Prepares you well for higher education.
- Gives you time to figure out what field you're most interested in.
- Denmark's gymnasium system is very solid.

2 Vocational Education and Training (Erhvervsuddannelser / EUD)

When to choose:

- If you prefer a more practical approach to learning.
- If you're interested in a trade, craft, or hands-on profession (IT-supporter, carpenter, electrician, chef, etc.).

Pros:

- You can enter the workforce faster.
 - Many vocational programs in Denmark combine school with paid apprenticeship.
-

3 International Options

Because you have an Armenian background and speak Danish fluently, you may have a small advantage if you want to pursue international studies later on. You could even consider:

- International Baccalaureate (IB)
 - Boarding schools (Efterskole for a year, if you haven't done it yet)
 - Exchange programs
-

4 Efterskole (Optional gap year type)

When to choose:

- If you want to spend a year figuring things out while still being in school.
 - If you want to build confidence, meet new people, or improve skills (languages, sports, arts, etc.).
-

Quick self-check questions:

- Do you enjoy academic schoolwork? → **Consider STX, HHX, HTX or IB**
 - Do you prefer practical, hands-on work? → **Consider EUD**
 - Are you unsure and want more time to explore? → **Consider Efterskole or HF**
-

My general advice to you:

Since you're fluent in Danish, you have full access to the Danish education system. If you're not sure yet what you want to do, **STX or HF** is usually a safe choice because they give you a broad education and keep your doors open for both university and vocational paths later.

👉 If you tell me a bit more (for example: your favorite subjects, if you enjoy hands-on work or theory, your dream job or interests), I can give you a much more personalized recommendation.

Shall we do that?
