I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cyprus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great point in life to reflect on your options! In Denmark, you have several good educational paths available after primary school (folkeskole), especially since you're fluent in Danish and have a multicultural background. Here's a breakdown of your main options and how you might think about choosing the best one:

Main Educational Paths After Primary School (Folkeskolen) in Denmark

1. Gymnasium (STX, HHX, HTX, HF) – Upper Secondary School (3 years)

These are more academically oriented and prepare you for university.

- **STX (Alment gymnasium):** General education with a focus on humanities, social sciences, or natural sciences. Great if you want broad university options.
- **HHX (Handelsskole):** Focus on business, economics, and international trade. Good if you're interested in business or entrepreneurship.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and IT. Ideal if you're interested in engineering, tech, or applied sciences.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more practical. For students who want a quicker path to further education.

2. Erhvervsuddannelse (VET – Vocational Education and Training)

A more hands-on education combining school and apprenticeship. You can train as a craftsman, electrician, healthcare worker, chef, etc.

- Good if you like learning by doing and want to enter the workforce quickly with a profession.
- You can later take further education (like an *Erhvervsakademi* or *Professionsbachelor*).

3. Kombinationsforløb / EUD10 (combined 10th year + vocational)

If you're not 100% sure yet, you can take a 10th-grade year that helps you explore different careers or combine with vocational education.

How to Choose

Ask yourself:

- Do I enjoy academic subjects like history, science, or math?
- Do I prefer practical, hands-on work?

- Am I aiming for university, or do I want to start working sooner?
- What are my interests—tech, business, healthcare, arts?

Personal Factors to Consider

- **Fluent in Danish:** You have full access to all Danish education options.
- **Cypriot roots:** That might give you an advantage in language or cultural subjects, or even inspire you to study something international like trade, languages, or politics.
- **Just finished primary school:** If you're not sure yet, a 10th-grade year (efterskole or regular 10th) can give you time to explore.

Recommendations (Based on Common Interests)

Here are some example profiles that might help you think about your own preferences:

If you like...	Consider...
Academic subjects, university	STX, HTX, or HHX
Business and finance	HHX
Science, IT, technology	HTX
Helping people, practical jobs	VET (e.g. healthcare, electrician, chef)
Exploring life + personal growth	Efterskole or 10th grade with a career focus
