I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that – it's great that you're thinking about your next steps. Since you've just finished **primary school** in Denmark (typically at age 16, this would be **9th or 10th grade**), you have several solid educational paths to consider. Your decision should depend on your **interests, strengths, and long-term goals**, but here's a breakdown of your main options in the Danish education system:

## 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are great if you're academically inclined and possibly planning to go to university later.

### Options include:

- **STX (Almen studentereksamen)** – Broad general education with focus on humanities, science, and social science.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science and technology.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year version focused on preparing for further education (often vocational or professional programs).

✅ *Recommended if:* You enjoy school, like academic subjects, and think you might want to go to university.

## 2. Vocational Education and Training (Erhvervsuddannelser - EUD)

These combine school and hands-on apprenticeships in workplaces. You train for a specific career, e.g., electrician, hairdresser, chef, mechanic, health worker, etc.

✅ *Recommended if:* You prefer practical learning, want to work earlier, or are interested in specific trades.

 *Bonus:* You can still continue to higher education afterward (e.g., erhvervsakademi or professionsbachelor).

## 3. EUX – Combined Vocational + Academic Path

EUX is a hybrid where you get both a **vocational qualification** and a **general upper secondary diploma**, allowing you to go straight to work or continue to higher education.

✓ *Recommended if:* You're interested in a trade but also want to keep the door open for university later.

## Your Strengths to Consider:

- You're **fluent in Danish**, which is a big advantage in both vocational and academic education.
- If you're **multilingual (Azerbaijani, possibly English)**, you might consider paths involving international studies, communication, or translation.

## Recommendations Based on Different Interests:

Your Interests	Recommended Path	Example Careers
Academic subjects, writing, history	STX	Teacher, journalist, lawyer
Technology, science	HTX or EUX-technical	Engineer, IT specialist
Business, finance	HHX or EUX-business	Economist, accountant, entrepreneur
Helping people, social work	HF or vocational health path	Nurse, educator, social worker
Working with your hands	EUD	Mechanic, carpenter, chef

## Final Tips:

- **Visit educational fairs** or **open house events** (åbent hus) to get a feel for each school.
- **Talk to a guidance counselor (studievejleder)** at your school or UU-vejledning – they can help match your interests and grades with the right path.
- **No path is final** – Denmark's education system is flexible, and you can switch or continue studying after finishing a vocational or academic program.

Would you like help choosing based on your **favorite subjects or career ideas**? I can help you narrow it down even more.
