I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Greece. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've finished primary school and are thinking seriously about your next steps. At 16 in Denmark, you're at the point where you usually choose between different **youth education programs** ("ungdomsuddannelser"). Since you're fluent in Danish and have a multicultural background, you have strong foundations to build on. Let me outline your main options and give you tailored recommendations based on different interests.

## 🎓 Main Education Paths After Primary School in Denmark

### 1. Gymnasiale uddannelser (Upper Secondary Education)

These programs prepare you for university.

- **STX (Almen Studentereksamen):** General academic focus. Good if you like humanities, science, or social science.
- **HHX (Højere Handelseksamen):** Business- and economics-focused. Good if you're interested in commerce, entrepreneurship, or international trade.
- **HTX (Højere Teknisk Eksamen):** Focuses on science, technology, and engineering.
- **HF (Højere Forberedelseksamen):** Shorter, more practical 2-year academic program. Good if you want to go to university but prefer less theory and more real-world application.

### 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These prepare you for a specific trade or job, often with apprenticeship.

- Ideal if you want to work as a chef, mechanic, carpenter, hairdresser, electrician, etc.
- Some programs combine school and real-world job experience.

### 3. Kombinationsuddannelser

For example, **EUX**, which combines a vocational education with elements of a gymnasial education, so you can both work and study further later.

## 🕒 What Should You Choose?

It depends on your **interests**, **skills**, and **career goals**. Here's some advice based on your situation:

✓ **If you're academically interested and considering university:**

- **STX** is the most general and flexible, great if you're unsure what to study later.
- **HHX** might be excellent if you're interested in business or using your Greek background in international trade, marketing, or tourism.
- **HTX** is good if you like science or engineering.

✓ **If you prefer practical learning and want a job sooner:**

- Go for an **EUD** in something hands-on. Denmark has great vocational training, and many trades are well-paid and respected.
- You could also do **EUX**, so you can work and keep the door open to future studies.

✓ **If you're unsure and want to keep your options open:**

- **HF** or **STX** can be a safe bet, giving you a broad education and time to figure things out.

## **With Your Background**

Your Greek heritage could be an advantage:

- In **business**, especially in import/export or tourism.
- In **languages**, cultural studies, or international relations.
- If you're interested, you might also explore careers in **translation, diplomacy, or international education**.

## **My Recommendation**

If you're curious, reasonably academic, and open to university later:

**Consider STX or HHX**, depending on whether you lean more toward general knowledge or business.

If you enjoy doing things hands-on or want a job sooner:

**Look into EUX**—it gives you both vocational skills and academic credentials.

Let me know what subjects you enjoy most or what kind of career you imagine—then I can give you even more specific advice.
