I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chad. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps give a clearer picture. Since you're 16 and just finished primary school in Denmark, your next educational step usually falls within the Danish **youth education system** ("ungdomsuddannelser"). Here's a breakdown of your main options and how you might choose between them, depending on your interests and goals:

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are 2-3 year academic programs that prepare you for university or other higher education.

Main types:

- **STX (Studentereksamen):** Broad academic program – great if you like subjects like history, languages, science.
- **HHX (Handelshøjskoleeksamen):** Focus on business, economics, and international trade – good for a business career.
- **HTX (Teknisk studentereksamen):** Focus on science, tech, and engineering.
- **HF (Højere forberedelseseksamen):** A 2-year program, more flexible and often better for those who want a shorter academic path.

✅ **Good if:** You enjoy academic subjects, might want to go to university, or aren't sure what career you want yet.

🔧 2. Vocational Education and Training (EUD - Erhvervsuddannelser)

This combines school and apprenticeship (praktik) in a company. You learn a trade and can start working directly after.

Examples of trades:

- Electrician, mechanic, carpenter
- Hairdresser, chef, social and health care worker

✅ **Good if:** You want to learn a skill and start working faster — or you enjoy hands-on learning.

3. EUX – Combination of vocational and academic

EUX is a mix of EUD and gymnasial education. It's more demanding but gives you both a trade **and** the qualifications to go to university later.

✓ **Good if:** You want the best of both worlds — a practical skill **and** the option for higher education.

How to choose?

Here are some questions to help you reflect:

- Do you enjoy school subjects and academic learning?
 - Do you learn better by doing and practicing?
 - Do you want to work soon, or study longer?
 - Are you interested in business, science, tech, health, or art?
 - Do you want to keep your options open for university later?
-

Your background matters — and it's a strength

Your heritage from Chad and your Danish upbringing give you a **unique cultural insight** and possibly **language skills** or **international perspectives**. These can be very valuable in areas like:

- International business (HHX)
 - Social work, health care, education
 - Technology and innovation (HTX or EUD/EUX in IT)
 - Public service, if you later pursue university
-

My advice?

If you're unsure:

- **Visit educational guidance counselors** at UU-vejledningen (they help all students).
 - **Try internships or “brobygning” weeks** to test different schools and paths.
 - Consider **EUX** if you like practical learning but want future flexibility.
 - If you're curious and academic, **STX or HHX** can open a lot of doors.
-

Would you like help matching your interests to specific programs or professions? Or are you leaning toward something like tech, business, healthcare, or creative work? I can help you narrow it down further.
