I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eritrea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—that gives a good starting point. Since you're 16 and just finished primary school in Denmark, you're at an important transition point. Here's a clear breakdown of your main educational options, and how to think about them:

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX, or HF)

- **STX (Almen gymnasium):** Focus on general academic subjects like languages, humanities, and sciences. Ideal if you're considering university later.
- **HHX (Handelsskolen):** Business and economics-focused. Great if you're interested in business, marketing, or finance.
- **HTX (Teknisk gymnasium):** Focus on technology, science, and innovation. Perfect if you're into science, IT, or engineering.
- **HF (Højere Forberedelseseksamen):** A 2-year alternative to STX for students who may want a shorter route to higher education.

2. EUD (Erhvervsuddannelse / Vocational Education and Training)

- Combines school and practical work experience (praktik).
- Ideal if you prefer hands-on work and want to become, for example, a carpenter, hairdresser, mechanic, social and healthcare worker, or chef.
- Still gives options to continue studying later via **EUX**, which combines vocational and academic studies.

3. EUX (Kombineret erhvervs- og gymnasial uddannelse)

- A combination of vocational training and academic subjects that qualifies you for both a skilled job and further university-level education.
- A good choice if you want both practical skills and the option to go to university later.

😞 How to Choose the Right Path for You

Ask yourself:

- **Do I want to study more academic subjects or work more practically?**

- **What subjects do I enjoy the most?**
- **Do I already know what career I might want?**
- **Do I want the option to go to university later?**

If you're not sure, **Gymnasium (STX, HHX, or HTX)** is a flexible option that keeps most doors open. If you prefer hands-on learning and want to enter the workforce sooner (but still have the option to study later), **EUD or EUX** might suit you well.

My Personal Recommendation Based on What You Shared

Since you're fluent in Danish, born and raised in Denmark, and finished primary school, you're well-placed for any path. If you:

- **Enjoy school and are curious about academic subjects:** Go for **STX** or **HTX** (if you like science and tech).
- **Are interested in business or economics:** Consider **HHX**.
- **Prefer practical, hands-on learning and want to learn a trade:** Try **EUD** or **EUX**—especially **EUX** if you want both practical training and the option to study more later.

Next Steps You Can Take

1. **Attend open houses (åbent hus)** at local gymnasiums and vocational schools to explore your options.
2. **Talk to a UU-vejleder (Ungdommens Uddannelsesvejledning)** — they can guide you based on your grades, interests, and opportunities.
3. **Try a “brobygning”** (bridge-building program), where you can test different education types before you commit.
4. **Ask your teachers** for advice—they often know what type of learning suits you best.

If you tell me more about what subjects or activities you like, I can give you more personalized advice. Want to try that?
