I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bosnia and Herzegovina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, living in Denmark, and have just completed primary school (9th or 10th grade, depending on your school), you're at a key point in your educational journey. In Denmark, there are several strong and flexible options depending on your interests, goals, and how you prefer to learn. Here's a breakdown to help you think through it:

## 🎓 1. Gymnasiale Uddannelser (Upper Secondary Education – 3 years)

This is the typical academic path if you're considering university later.

### Options:

- **STX (Alment Gymnasium):** Broadest academic path. Great if you like subjects like Danish, history, languages, and science.
- **HHX (Handelsskolen):** Focus on business, economics, and international trade.
- **HTX (Teknisk Gymnasium):** Focus on technology, natural sciences, and innovation.
- **HF (Højere Forberedelseksamen):** A 2-year alternative with a more practical and mature student environment. Suits people who want a shorter, more focused academic program.

### ✅ Good for you if:

You enjoy academic subjects and might want to go to university later (e.g., engineer, teacher, doctor, lawyer, etc.)

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD/EUX)

This path combines school and apprenticeship – you learn both in school and by working in a real company.

### Options:

- **EUD:** Fully vocational. You become a skilled worker (e.g., carpenter, chef, hairdresser, electrician).
- **EUX:** Combines vocational training with subjects that qualify you for university later. Best of both worlds.

### ✅ Good for you if:

You prefer hands-on learning and want to start working earlier – but want to keep the option of further education.

## How to Choose?

Ask yourself:

- Do I like school and studying theory, or prefer practical tasks?
- Do I want to go to university later or get a job sooner?
- What subjects or hobbies interest me most (science, art, tech, business, helping people)?

---

## With Your Background

You're fluent in Danish and have a multicultural background – that's a huge strength! Depending on your interests, you might consider:

- **International programs (like IB – International Baccalaureate)** if you're interested in global careers or want to study abroad.
- Using your bilingual skills (e.g., Danish + Bosnian) in careers like translation, diplomacy, or healthcare.

---

## My Recommendation

If you're unsure what you want yet:

- **STX** or **EUX** are great general paths that keep many doors open.
- **Book a guidance meeting with UU-vejledningen (Ungdommens Uddannelsesvejledning)** – they can give you advice based on your grades, interests, and options nearby.

Would you like help picking a path based on your favorite subjects or what you want to work with in the future?
