I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've just finished primary school—congratulations! Since you're 16 and based in Denmark, there are several solid educational paths available to you depending on your interests, skills, and future goals. Here's a breakdown of your main options after *folkeskolen* (primary/lower secondary school) in Denmark, and how to think about choosing the right one:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university or other higher education.

STX (Almen Studentereksamen)

- Focus: Broad academic education with emphasis on humanities, natural sciences, and social sciences.
- Good if you're interested in a wide range of subjects and want to keep your options open.

HTX (Teknisk Gymnasium)

- Focus: Technology, natural sciences, and innovation.
- Good if you're interested in engineering, tech, or science careers.

HHX (Handelsgymnasium)

- Focus: Business, economics, international trade, and marketing.
- Great if you're thinking about business, entrepreneurship, or economics.

HF (Højere Forberedelseksamen)

- A 2-year program (vs. the 3 years of STX/HTX/HHX).
- Less intense and more practical.
- Good for mature students or those who want a quicker route to certain vocational programs or universities.

2. Erhvervsuddannelser (Vocational Education and Training – VET/EUD)

- Combines school and apprenticeship in a company.
- Learn a trade: electrician, carpenter, chef, hairdresser, etc.
- You earn money during your apprenticeship.
- Great if you prefer practical learning and want to enter the job market faster.

 *There's also EUX, which combines vocational training with academic subjects so you can qualify for higher education as well.*

Special options for bilingual or multicultural students:

- Some schools and programs in Denmark emphasize international perspectives or offer Spanish as a subject, which might appeal to you given your Chilean background.
- You could also look into schools with exchange programs or global studies lines.

What to think about when choosing:

1. What are your interests?

- Do you enjoy science, tech, art, business, or hands-on work?
- What school subjects did you like most?

2. How do you learn best?

- Do you prefer academic/theoretical learning (choose STX, HHX, HTX)?
- Or more practical, hands-on learning (consider EUD/EUX)?

3. Future goals?

- University or quick route to a job?
- Want to work internationally or stay in Denmark?

My Suggestion Based on Your Info:

Since you're fluent in Danish, were born and raised in Denmark, and likely understand both cultures, you're in a good position for any of the options. If you're not sure what you want to do yet but like learning and want to keep your options open:

 **STX or HHX would be a great choice.**

- **STX** if you enjoy subjects like history, science, or languages.

- **HHX** if you're more curious about business, economics, or international trade (your Chilean background could be a plus here!).

If you know you prefer doing practical work or want to start earning sooner, **EUX** gives you the best of both worlds.

If you'd like, I can help you explore specific schools or programs near where you live. Let me know your interests or city, and I'll narrow things down for you.
