I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Australia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're fluent in Danish and have an international background—it gives you a lot of flexibility and opportunities. Since you're in Denmark and just finished primary school, you're at a key transition point where you'll typically choose between different types of **secondary education**. Here's a breakdown of your options and some advice depending on your interests and goals:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These programs prepare you for university. They typically take **3 years** (except HF which takes 2 years) and are a common path for academically-oriented students.

♦ STX – Alment Gymnasium

- Focus: Broad general education with humanities, science, and social studies.
- Good for: Students who are unsure about their future career but want to keep university options open.

♦ HHX – Handelsgymnasium

- Focus: Business, economics, and international trade.
- Good for: Students interested in business, marketing, finance, or starting a company.

♦ HTX – Teknisk Gymnasium

- Focus: Science, technology, engineering, and math (STEM).
- Good for: Students interested in technology, engineering, design, or IT.

♦ HF – Højere Forberedelseseksamen

- Focus: Similar to STX but shorter (2 years), often more practical.
- Good for: Students who want a quicker route to higher education or didn't enjoy primary school much.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Focus: Practical skills and apprenticeships (e.g., electrician, carpenter, hairdresser, chef).

- Duration: 2–5 years depending on trade.
- Good for: Students who enjoy hands-on learning and want to enter the workforce quickly.

3. International Opportunities

With your Australian background and fluent Danish, you could also explore **international or bilingual education**, such as:

- **International Baccalaureate (IB)** programs in Denmark
- Studying abroad later, especially in English-speaking countries

IB is challenging but opens doors globally and might suit you if you're considering international university studies or careers.

How to Choose?

Ask yourself:

1. **What subjects do I enjoy most?** (Math, language, science, arts, etc.)
2. **Do I prefer practical learning or academic study?**
3. **Do I think I want to go to university someday?**
4. **Do I want to work right after school or study more?**
5. **Would I enjoy studying in English, Danish, or both?**

Recommendation

If you're not sure yet what career you want, I'd suggest considering **STX** or **IB**. These give you the most flexibility to choose a university path later—especially if you're curious about both Denmark and Australia.

But if you already know you're interested in something like technology or business, **HTX** or **HHX** could be a great fit.
