I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Namibia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background — and congratulations on finishing primary school! That's a big step.

In Denmark, after primary school (folkeskole), you have several good options depending on your interests, strengths, and long-term goals. Since you're 16, you're at the typical age to choose a **youth education program (ungdomsuddannelse)**. Here are the main paths:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs are great if you're interested in **university** later on.

a. STX (Almen studentereksamen)

- Focus: Broad subjects – humanities, natural sciences, and social sciences.
- Duration: 3 years.
- Good if you're not sure what you want to study yet.

b. HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing.
- Duration: 3 years.
- Great if you're interested in business, finance, or management.

c. HTX (Higher Technical Examination)

- Focus: Technology, science, engineering.
- Duration: 3 years.
- Ideal if you like math, physics, chemistry, or IT.

d. HF (Higher Preparatory Examination)

- Focus: More flexible, fewer subjects.
- Duration: 2 years.
- Good if you want a shorter, more focused path to higher education.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine **school + apprenticeship**. Perfect if you prefer practical, hands-on learning.

- Examples: Electrician, carpenter, hairdresser, mechanic, social and health care, etc.
- Duration: Usually 3–4 years (some shorter or longer).
- Leads to a job but can also open the door to further education, like **EUX** (which mixes vocational + academic subjects).

♦ 3. EUX – Vocational + Academic Hybrid

- Combines EUD with gymnasium-level subjects.
- Takes about 4–5 years.
- Prepares you both for a job **and** for university.

♦ Which path might suit you?

That depends on:

- **Your interests:** What subjects or topics excite you?
- **Your strengths:** Are you more academic, creative, or practical?
- **Your long-term goals:** Do you want to go to university, start working earlier, or keep your options open?

✅ Some guiding questions:

1. Do you enjoy school subjects like Danish, English, history, or science?
2. Do you like building, fixing, or creating things with your hands?
3. Are you interested in business, IT, health, or design?
4. Would you rather study for 2–3 more years full-time, or learn through working and studying?

Next steps:

- Talk to an **educational guidance counselor (studievejleder)** at your school or local UU-vejledning.
- Visit open house events at schools (Åbent Hus).
- Try a **brobygning** or **praktik** (short internships or trial weeks) to explore different programs.

If you tell me a bit more about what you enjoy (subjects, hobbies, goals), I can give you a more specific recommendation. Want to do that?
