I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking ahead about your future — and congratulations on finishing primary school!

Since you're 16 and just completed primary school in Denmark, you're now at a stage where you can choose between different types of youth education (**ungdomsuddannelser**) depending on your interests, strengths, and future goals. Let's explore your main options in Denmark and help you think about what might suit you best.

Main Educational Paths in Denmark After Primary School:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university or other higher education.

- **STX (Almen studentereksamen):** Broad general education – good if you're interested in subjects like humanities, science, social studies.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade – great if you like business or want to study marketing, finance, or management.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and innovation – great if you enjoy science, IT, or engineering.
- **HF (Højere forberedelseksamen):** A more flexible 2-year academic program – often used by students who didn't take the traditional 9th/10th grade path.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

These prepare you directly for a job and can lead to higher education too.

- Combine school with apprenticeships in real companies.
- Fields include: health care, construction, IT, mechanics, childcare, hospitality, and more.
- Duration: 2 to 5 years depending on the program and specialization.

3. Kombinationsforløb

If you're unsure, some schools offer combined programs (like **EUX**) where you can **both learn a trade and get academic qualifications**, giving you flexibility to work or study further.

How to Choose the Right Path for You

Ask yourself:

- Do I want to go to university later? → Then **STX, HHX, HTX, or HF** might be right.
 - Am I more practical, and prefer hands-on work? → Then **Erhvervsuddannelse** or **EUX** could be better.
 - Do I have a clear interest already (e.g., technology, business, health, arts)?
 - Do I want to start working soon, or am I ready to study more?
-

With Your Background

Being fluent in Danish and having roots in Nepal can be a strength:

- You can bring multicultural understanding to areas like **healthcare, education, or international business**.
- Bilingual skills are valuable — consider careers in **translation, international relations, or tourism**.
- If your family values education
