I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking about your future this early! Since you're 16 and just finished primary school in Denmark, you're likely at the stage where you need to choose between different **youth education programs** ("ungdomsuddannelser") that typically follow the 9th or 10th grade.

In Denmark, you generally have two main paths after primary school:

♦ 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are academic programs that prepare you for higher education (university or similar):

- **STX (Studentereksamen)** – Broad academic focus with many subjects (sciences, humanities, social sciences).
- **HHX (Handelsskole)** – Focus on business, economics, and international trade.
- **HTX (Teknisk Gymnasium)** – Focus on technical and scientific subjects.
- **HF (Højere Forberedelseseksamen)** – A shorter, 2-year program more practical in nature, also leads to higher education.

Choose this if:

- You want to go to university later.
- You enjoy theoretical subjects like math, science, languages, or social studies.
- You're not sure what career you want yet, but want to keep your options open.

♦ 2. Vocational Education and Training (Erhvervsuddannelser / EUD)

These are hands-on programs that combine school with apprenticeship in a workplace. You can become anything from an electrician to a hairdresser to a chef.

Choose this if:

- You want to start working and earning money sooner.
- You like practical, hands-on learning.
- You already have an interest in a specific trade or career.

There are even **EUX** programs that combine vocational training with academic courses, so you can still go to university later if you want.

♦ What to Consider:

Here are a few guiding questions:

- Do you enjoy school and academic subjects?
- Do you already have a career in mind?
- Are you more hands-on or more theoretical?
- Do you want to start working soon or study longer?

Personal Tip

Since you're bilingual, have a multicultural background, and speak fluent Danish, you might have unique strengths in communication, intercultural understanding, and language. That could be valuable in fields like:

- **International business (HHX)**
- **Healthcare or education (STX or HF)**
- **IT or engineering (HTX or EUD with EUX)**

If you tell me a bit more about your interests—subjects you enjoy, what kind of work excites you, or any goals you have—I can help recommend a more specific direction!
