I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking about your future now—this is the perfect time to explore your options. Since you just finished primary school in Denmark (which typically ends around 9th or 10th grade), your next step will be **youth education ("ungdomsuddannelse")**. In Denmark, there are a few main paths to choose from, depending on your interests, strengths, and career goals.

Here's a breakdown of the most common options, and some advice to help you choose:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for university or other higher education. There are several types:

- **STX (Almen studentereksamen)** – Broadest option with a mix of humanities, science, and social science.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international relations.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseksamen)** – A 2-year program, often for those who are more practically oriented or want a faster route to university.

Recommended if:

- You enjoy academic subjects and might want to go to university later.
- You want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training, VET/EUD)

This is more hands-on and prepares you for a trade or profession (e.g. electrician, carpenter, hairdresser, chef, healthcare worker, etc.). Usually involves both school and apprenticeship/work experience.

Recommended if:

- You prefer practical work to sitting in a classroom all day.
- You want to start working earlier (often already during the education).
- You are interested in a specific skill or job.

What to Consider

- **Your Interests:** What subjects do you enjoy most in school? What activities make you feel excited or proud?
- **Your Strengths:** Are you more academic, creative, social, practical?
- **Long-Term Goals:** Do you want to go to university? Start working soon? Start your own business?

Special Note: Your Background

Being fluent in Danish, born in Denmark, and having roots in Comoros gives you a **unique advantage**. You may have intercultural skills, multiple languages, and different perspectives—these are valuable in many careers like:

- **International business (HHX could be a great start)**
- **Healthcare and social work (VET or HF can help here)**
- **Law, education, or politics (STX might be the right path)**

My Recommendation

Since I don't know your exact interests yet, here's a general suggestion:

- If you're academically strong and want many options later: **STX** or **HHX**.
- If you prefer learning by doing and want to start working earlier: **EUD (Vocational)**.
- If you're not sure yet and want a flexible path: **HF** can be a good choice.

Would you like to tell me more about your interests or subjects you enjoy? I can then help you make a more specific recommendation.
