I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background! At 16 and living in Denmark, you're at a key point where you decide what kind of education or career direction to explore after primary school (typically folkeskole). Since you're fluent in Danish and born in Denmark, you have access to the full range of Danish educational options.

Here's an overview of the main educational paths available to you now, along with some guidance depending on your interests and goals:

♦ 1. Gymnasiale Uddannelser (Upper Secondary Education – Academic Path)

If you're interested in university later or enjoy academic subjects like languages, science, or social studies, this is probably the best choice.

Options include:

- **STX (Almen studentereksamen)** – General academic upper secondary education. Broadest option with science, humanities, and social science.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter 2-year academic program, more flexible and practical; good if you're not into a full 3-year academic program.

➡ **Recommended if:** You like school, want a broad academic education, and might be interested in going to university later.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – VET)

If you're more hands-on, interested in a profession (like carpenter, electrician, chef, child care, health care), this could be the right fit.

- Combines **school + apprenticeship** in a company.
- Usually 3–4 years depending on the field.
- You can still go to university later with certain vocational programs if you want.

➡ **Recommended if:** You prefer practical learning, want to start working earlier, and have a specific trade or profession in mind.

♦ 3. Kombinerede forløb / EUX

This combines vocational education **with academic qualifications**, so you get both a professional qualification and the right to apply to university.

➔ **Recommended if:** You're interested in working and studying at the same time, and want to keep your options open.

♦ 4. Efterskole / Højskole (Optional before further education)

An **efterskole** is a one-year residential school for students aged 14–18. It's a unique Danish experience that offers personal development, sports, arts, or other interests in a less formal setting.

➔ **Recommended if:** You want to take a year to grow socially, explore interests, or improve skills before choosing the next step.

Questions to help narrow it down:

- Do you enjoy school and studying academic subjects?
- Do you have a specific profession or field you're interested in?
- Would you like to work sooner, or are you open to studying for longer?
- Would you consider university later on?

If you give me your interests (e.g., science, arts, business, technology, healthcare, working with people, etc.), I can help guide you more precisely.
