I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — and congratulations on finishing primary school! That's a big milestone. In Denmark, after primary school (Folkeskole), you have a few good options depending on your interests, strengths, and future goals. Here's a clear overview of the main paths you can take:

1. Gymnasium (General Upper Secondary Education)

This is the most common path for students who are interested in going to university later.

Types:

- **STX:** General upper secondary education – broad, includes science, languages, and humanities.
- **HHX:** Focus on business, economics, and international trade.
- **HTX:** Focus on technology, science, and IT.
- **HF:** A shorter, 2-year general education program (more practical and often taken later or by students who want a second chance).

✓ Best for you if:

- You enjoy academic subjects.
- You might want to go to university later.
- You're still exploring your interests.

2. EUD (Erhvervsuddannelse – Vocational Education and Training)

These are practical training programs that lead to skilled jobs like electrician, chef, mechanic, carpenter, etc.

✓ Best for you if:

- You prefer hands-on work.
- You want to start earning earlier.
- You're interested in a skilled trade.

You can also do a **EUX**, which combines vocational training with a more academic curriculum, keeping university options open.

3. 10th Grade (10. klasse)

Optional extra year before choosing your next path.

Best for you if:

- You're unsure what to choose.
- You want to improve grades.
- You want more time to mature or explore different subjects.

What to Consider

- Do you enjoy schoolwork, reading, and academic subjects?
- Do you like working with your hands or creating things?
- Do you have any interests in business, tech, art, or health?
- Would you like to go to university in the future?

Your Cultural Background

Having roots in Mauritius is a strength. You may have cultural awareness, language skills, or international connections that can be useful in fields like:

- International business (HHX)
- Languages or diplomacy (STX)
- Tourism or hospitality (EUD + language skills)
- IT or engineering (HTX)

My Suggestion (based on what you've said)

Since you're fluent in Danish, born and raised here, and just finished primary school:

If you're academically inclined or unsure:

Go to STX or HHX – it keeps the most doors open.

If you like working practically and want to enter the job market earlier:

EUX or a vocational program like EUD could be great, especially if you want both skills and the option to study more later.

👉 **If you're not ready to choose yet:**

Take 10th grade – use the year to explore, grow, and prepare.

Would you like help narrowing it down based on your interests (e.g. science, business, tech, art)? Or would you like an example of a student path that could match your background and strengths?
