I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Costa Rica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great – you're in an exciting stage of life, and being bilingual with Danish and Costa Rican heritage gives you a rich background to build from.

In Denmark, after finishing primary school (folkeskolen), you typically have a few main options:

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are for students who want to go on to university. There are different types:

- **STX (Studentereksamen)** – Broad, academic focus. Good if you're interested in humanities, sciences, or social studies.
- **HHX (Higher Commercial Examination Programme)** – Focuses on business, economics, and international trade. Great if you're interested in business or working internationally.
- **HTX (Higher Technical Examination Programme)** – Focuses on science, tech, and engineering.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), often chosen by more mature students or those who want a faster track to specific education paths.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

If you're more hands-on or want to enter the workforce sooner with practical skills, this could be the right path. Examples:

- Becoming a carpenter, electrician, hairdresser, chef, IT supporter, etc.
- You combine school with internships in real companies (praktikpladser).

3. International options

Because of your Costa Rican roots, you might also consider:

- **IB (International Baccalaureate)** – An English-language upper-secondary education with global recognition. Offered at some Danish schools.
- This could be especially good if you're thinking about studying or working abroad one day.

What to consider when choosing:

- **What are your interests?**

Do you enjoy science, business, languages, technology, creative arts, or something else?

- **Do you want to go to university later?**

If yes, then STX, HHX, HTX, or IB are good paths.

- **Do you want to start working earlier or prefer hands-on experience?**

Then VET might be a better fit.

- **Do you want to keep doors open for both Denmark and Costa Rica (or elsewhere)?**

The IB or HHX could be helpful here due to their international focus.

Personal Recommendation (based on what you've shared):

Since you're fluent in Danish, have a multicultural background, and are just finishing primary school:

- If you're academically curious and want flexibility later: **STX** is a safe and respected general path.
- If you're interested in business, economics, or maybe international work: **HHX** is a strong option.
- If you enjoy tech or sciences: **HTX** could be a good fit.
- If you're not sure and like the idea of an international environment: **IB** is worth looking into.

Would you like to tell me a bit more about your interests or what subjects you enjoy? I can then give a more tailored suggestion.
