I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thank you for sharing your background — you're at an exciting point in life with many opportunities ahead! Since you're 16 and have completed primary school in Denmark, your next step would usually be to enter **youth education (ungdomsuddannelse)**. There are several paths available, and the best one for you depends on your interests, strengths, and goals. Here's a breakdown of the main options:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're interested in further academic studies or want to go to university in the future, this is the most common choice.

Main types:

- **STX (Studentereksamen)** – general and broad; good for university preparation.
- **HHX (Higher Commercial Examination)** – focused on business, economics, marketing.
- **HTX (Higher Technical Examination)** – focused on science, technology, and engineering.
- **HF (Higher Preparatory Examination)** – 2-year program (instead of 3), more practical and often for students who didn't follow the traditional academic path.

Recommended if:

You enjoy school subjects like Danish, math, science, languages, economics, etc., and you're considering university in the future.

🔧 2. Erhvervsuddannelse (Vocational Education and Training, EUD)

This is a more practical path that combines school with on-the-job training. You can become everything from a mechanic to a hairdresser, carpenter, electrician, or healthcare worker.

Advantages:

- You earn money during your apprenticeship (praktik).
- You're ready to work right after finishing.
- Still possible to go to further education via *EUX* or other pathways.

Recommended if:

You like working with your hands, want a job sooner, or are more practical than academic.

3. EUX – A Combination of Vocational and Academic

A great hybrid path if you're not sure whether you want to work or study later.

You get:

- A vocational qualification + access to higher education (like STX)
- Best of both worlds but more demanding

Recommended if:

You want job skills and the option to go to university later.

Tips for Choosing:

- **Talk to a guidance counselor (studievejleder)** – they can help you decide based on your strengths and interests.
 - **Visit schools or attend orientation days (brobygning).**
 - **Think about your future goals:** Do you want to work soon? Study more? Travel? Start a business?
-

With your Albanian background:

You're already multilingual, which is a huge asset. Consider:

- Careers in **international business, translation, diplomacy, or language teaching.**
 - Adding **English, German, or French** at gymnasium for even more international opportunities.
-

Final Thought:

You're in a strong position. You're fluent in Danish, culturally flexible, and have the full Danish education system open to you. If you're unsure, **STX or EUX** are very safe, flexible choices that keep most doors open.

Would you like help choosing between specific schools or programs near where you live?
