I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Egypt. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great point in your life to start thinking carefully about your future — and it's really positive that you're reflecting on your options. Since you just finished primary school in Denmark (which usually ends after 9th or 10th grade), you now have several pathways to choose from, depending on your interests, strengths, and future goals.

Here's an overview of your main **educational options in Denmark** after primary school, along with who they're typically a good fit for:

## 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic high school programs that prepare you for university.

### Options:

- **STX (Almen studentereksamen):** Broadest, with science, languages, humanities.
- **HHX (Højere handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen):** A 2-year option, more practical, also leads to university.

### Best for you if:

- You enjoy academic subjects.
- You're interested in possibly going to university.
- You're not sure what job you want yet and want to keep options open.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This path combines school with apprenticeships, leading directly to skilled trades and professions.

### Examples:

- Electrician
- Carpenter
- Hairdresser

- Chef
- Healthcare assistant

### Best for you if:

- You prefer practical, hands-on learning.
- You want to start working sooner.
- You're interested in a specific trade or craft.

## 3. Kombinationsforløb (EUX)

A combination of vocational training **and** academic high school. You graduate with both a vocational qualification **and** a studentereksamen.

### Best for you if:

- You want the practical skills of a trade.
- You also want the option to go to university later.
- You're ambitious and ready for a challenge.

## So, What Should You Choose?

That depends on **who you are** and **what you want**. Here's a way to think about it:

Statement	If you say "Yes"...	Recommended path
I enjoy reading, writing, and school subjects like history, science or languages	✓	STX, HTX, or HF
I'm interested in business, marketing, or finance	✓	HHX
I like building, creating, or fixing things	✓	EUD or EUX
I want to get a job quickly and be independent	✓	EUD or EUX
I want to go to university someday	✓	STX, HHX, HTX, or EUX
I'm not sure what I want yet	✓	STX or HF (more general)

## Final Advice – Based on Your Background

Since you're fluent in Danish, born and raised in Denmark, and have a bicultural background (Egyptian roots), you might also think about:

- Using your cultural understanding in future roles (e.g., international business, teaching, translation, healthcare, social work).
- Leveraging your language skills (do you speak Arabic too? That's a big asset!).
- Exploring paths where representation and diversity matter — your unique voice can make a difference.

## Want More Personalized Help?

If you tell me more about:

- What subjects you like/dislike,
- Whether you want to work soon or study longer,
- If you speak Arabic or other languages,
- If you have any career ideas (even just rough ones),

...I can give you much more tailored advice.
