

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Venezuela. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and you're considering your next steps, here are some personalized educational paths you might consider—based on the Danish education system and your background:

1. Gymnasiale Uddannelser (Upper Secondary Education)

This is a common path for students after 9th or 10th grade in Denmark. It prepares you for university later, if you want that option.

Options include:

- **STX (Alment Gymnasium)** – Focus on general academic subjects (science, languages, humanities).
- **HHX (Handelsskole)** – Business and economics focus.
- **HTX (Teknisk Gymnasium)** – Focus on science and technology.
- **HF (Højere Forberedelseseksamen)** – 2-year program for students who are more mature or want a shorter academic route.

Recommendation:

If you're not sure yet what you want, **STX** is a flexible and well-rounded choice. If you're into tech or science, **HTX** is a great fit. If business interests you, **HHX** could be smart.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more interested in practical skills or working with your hands, this is a great route. You learn a trade (like electrician, carpenter, chef, etc.) and often start earning money earlier.

Example paths:

- **EUX** – Combines vocational training with academic subjects, so you can still go to university later.
- **EUD** – Purely vocational.

Recommendation:

If you're hands-on, but want to keep your academic options open, **EUX** is a powerful hybrid route.

3. Use Your Background to Your Advantage

You speak Danish fluently and likely have some connection to Spanish or Latin American culture through your parents. That's a **huge advantage**.

- Language studies (Danish/Spanish/English) can open doors to diplomacy, translation, international business, or education.
 - International schools or **IB (International Baccalaureate)** programs are also an option, especially if you might want to study or work abroad later.
-

How to Decide?

Ask yourself:

- Do I want to go to university? → Choose a **gymnasial** path.
- Do I prefer practical learning? → Consider **EUD** or **EUX**.
- Am I motivated by subjects like tech, business, or global issues? → Choose a gymnasium that aligns with that.

Also: talk to a guidance counselor (vejleder) at your school—they can help you explore local programs and give tailored advice.

Would you like me to help you compare a few specific programs in your area? Or explore careers based on your interests?
