

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking ahead! In Denmark, you have a few good educational paths to choose from after primary school (folkeskole). The right one depends on your interests, strengths, and goals. Here's a breakdown to help you decide:

## General Education Pathways (Gymnasiale uddannelser)

These are ideal if you're considering university later.

1. **STX (Almen studentereksamen)** – The most common upper secondary education.
  - Focus: Broad academic subjects (science, languages, social studies, arts).
  - Good for: University-bound students who want a well-rounded education.
2. **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
  - Focus: Economics, marketing, international relations.
  - Good for: Students interested in business or commerce, possibly even internationally.
3. **HTX (Højere teknisk eksamen)** – Focus on science and technology.
  - Focus: Engineering, IT, biotechnology, design.
  - Good for: Students interested in STEM fields or applied sciences.
4. **HF (Højere forberedelseksamen)** – A shorter, 2-year academic program.
  - Focus: General subjects, but more compact and practical.
  - Good for: Those who prefer a shorter route to university or professions requiring a general education.

## Vocational Education (Erhvervsuddannelser / EUD)

Great if you prefer hands-on learning or want to work sooner.

- Fields: Carpentry, electric work, healthcare, IT support, culinary arts, etc.
- Includes a mix of school and apprenticeship.
- Ends with qualifications for specific professions.
- You can also do **EUX**, which combines vocational training with an academic upper secondary diploma—this keeps the door open to university.

## With Your Spanish Background

Being bilingual and bicultural is a huge asset. You could:

- Choose **HHX** with an international profile or language focus.
- Consider **IB (International Baccalaureate)** if your school offers it (teaches in English, internationally recognized).
- Use Spanish in careers like international business, tourism, diplomacy, or translation.

---

## My Suggestion (Based on What You've Shared)

Since you're fluent in Danish, have Spanish heritage, and just finished Danish folkeskole, a good starting point could be:

- **STX** if you're academically curious and want many options.
- **HHX** if you're interested in business or international careers.
- **EUX** if you want both practical skills and academic flexibility.

---

If you tell me a bit more about your interests—subjects you like, career ideas, or how you like to learn (hands-on or theoretical)—I can give a more tailored recommendation!
