I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and an important time in your life to reflect on your interests and goals. Since you just finished primary school in Denmark (which typically ends after 9th or 10th grade), you now have several educational paths to choose from. Here's a breakdown of your options and how you might choose between them:

## 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university.

The main types are:

- **STX (Studentereksamen):** Broad academic focus (languages, sciences, humanities).
- **HHX (Højere Handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen):** Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen):** A 2-year general education program, often used for a later entry to vocational programs or university.

Choose this if:

- You enjoy academic subjects.
- You're considering university in the future.
- You're not yet sure what you want, but want to keep doors open.

## 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These programs combine school and apprenticeship in a company (praktik).

Examples:

- Electrician, carpenter, hairdresser, chef, mechanic, health care worker, etc.

Choose this if:

- You prefer practical, hands-on learning.

- You want to enter the workforce earlier.
- You're interested in a specific trade or profession.

You can also combine this with general subjects through **EUX**, which allows you to get both a vocational qualification and the possibility to enter university later.

### 3. International or Bilingual Pathways

Since your parents are from Georgia and you may have a multicultural background, you might consider an **international school**, **IB (International Baccalaureate)**, or bilingual programs if available in your area.

#### Choose this if:

- You're interested in international careers or studying abroad later.
- You speak or want to develop strong skills in English and possibly Georgian.

#### Things to Think About:

- **What subjects do you enjoy the most?** (Math? Languages? Social science? Hands-on work?)
- **Do you learn best through books and theory, or through doing things practically?**
- **Would you like to go to university later on, or start working earlier?**
- **Do you want to work in Denmark, Georgia, or internationally in the future?**

#### Recommendation Based on Your Info:

Since you're fluent in Danish, born in Denmark, and just finishing school here, the natural next step is one of the **gymnasiale uddannelser** if you enjoy school and want to keep your options open.

If you're more interested in practical work or already have a job or trade in mind, a **vocational education (EUD or EUX)** can be a strong and respected choice in Denmark too.

You could also:

- Talk to your school counselor (studievejleder) to discuss your interests.
- Try a **bridge-building program (brobygning)** where you visit different schools to get a feel for them.
- Attend open house events (åbent hus) at local gymnasier and vocational schools.

If you'd like, I can help you compare specific schools or programs near where you live. Just tell me your city or region in Denmark.
