I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking carefully about your next steps — that's a smart move. Since you've just finished primary school in Denmark (which typically means you're around the end of 9th or 10th grade), you now have a few different paths you can consider, depending on your interests, strengths, and future goals.

Here's a clear overview of the main educational paths in Denmark after primary school (folkeskole), along with some guidance:

## ♦ 1. Gymnasiale Uddannelser (Upper Secondary Education) – Academic Focus

If you're interested in going to university later and enjoy academic subjects, this is the most common choice.

### Most common options:

- **STX (Studentereksamen)** – Broad academic program, includes humanities, science, and social science tracks. Good if you're still exploring your interests.
- **HHX (Handelshøjskoleeksamen)** – Focus on business, economics, and international trade. Good if you're interested in business, management, or finance.
- **HTX (Teknisk studentereksamen)** – Focus on technology and science. Great if you're into engineering, IT, or technical subjects.
- **HF (Højere Forberedelseksamen)** – A 2-year option, more flexible, often for students who want a shorter academic path or are more mature.

### ✅ Recommended if:

You enjoy studying theory and want to go to university later. If you're not sure what you want to be yet, STX is a flexible and respected path.

## ♦ 2. EUD / EUX – Vocational Education and Training

If you're more hands-on and interested in entering the workforce with practical skills or learning a trade.

### Differences:

- **EUD:** Purely vocational. You'll train for a specific profession (like carpenter, electrician, hairdresser, healthcare assistant).

- **EUX:** A mix of vocational and academic. You get a vocational education *and* a study-qualifying exam, so you can also apply to university later.

✓ **Recommended if:**

You like practical work, want to earn money during your education, or want to become skilled in a trade. EUX is great if you want to keep your academic options open.

♦ **3. 10. Klasse (Optional)**

If you want more time to decide, strengthen your skills, or improve grades, you can take an extra year in 10th grade. Some programs also include internships or project-based learning.

✓ **Recommended if:**

You're not sure yet what to choose or want to prepare better for upper secondary education.

✓ **So, what's the best path for you?**

Here are a few guiding questions:

- **Do you like reading, writing, and studying subjects like history, science, or math?** → Consider STX or HTX
- **Are you more into business, money, or working in international environments?** → Look at HHX
- **Do you want to work with your hands, in a skilled trade, or get a job more quickly?** → Explore EUD or EUX
- **Still unsure or feel like you need more time to grow or decide?** → 10th grade could be a good transition year

☀ **As someone with roots in Myanmar and fluent in Danish...**

You have a multicultural background and bilingual skills that could be valuable in fields like:

- International business (HHX)
- Healthcare (EUD / EUX)
- Education or social work (STX or HF)
- IT and technology (HTX)

Let me know what subjects you enjoy or what kind of work sounds interesting to you — and I can help narrow things down even further!
