

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lithuania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, have finished primary school (folkeskole), and are fluent in Danish, you have several good options in the Danish education system. What's best depends on your interests, strengths, and future goals. Here's a breakdown of the main paths you can consider:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academically focused and prepare you for higher education (university or professional bachelor):

- **STX (Almen studentereksamen)** – Broad focus: humanities, science, social science. Good if you're not sure yet what to study later.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and languages. Great if you're interested in commerce, entrepreneurship, or international careers.
- **HTX (Højere teknisk eksamen)** – Focus on science and technology. Ideal if you like engineering, IT, or science.
- **HF (Højere forberedelseseksamen)** – A 2-year program with a more practical and compressed structure. Good if you want a faster route or a more hands-on approach.

✓ *Recommended if:* You want to keep the door open for university or aren't sure yet what you want to do.

2. Erhvervsuddannelser (Vocational Education & Training – EUD)

These are for learning a trade or profession, and include both school and apprenticeship (praktik) with a company.

Examples:

- Carpenter, Electrician, Mechanic
- Hairdresser, Chef, Health care worker
- IT-supporter, Web developer

✓ *Recommended if:* You enjoy practical work and want to start earning earlier or don't plan on going to university.

3. EUX – A mix of vocational and academic

This combines EUD (a trade education) with the possibility to take general subjects like in gymnasiet. After EUX, you can both work in your field and continue to higher education.

✓ *Recommended if:* You like hands-on work but still want the option of going to university later.

4. Other Options

- **10. klasse** – If you feel unsure or want to improve your grades before starting the next step.
 - **Efterskole** – A unique Danish experience where you live at a school for a year. Can be great for personal development and trying new subjects.
-

Some Considerations for You Personally

Since you're fluent in Danish, born in Denmark, and have a multicultural background, you have the advantage of moving comfortably between cultures. You might thrive in fields like:

- **International business or diplomacy (via HHX + university)**
 - **Technology or IT (via HTX, EUX, or EUD)**
 - **Healthcare or social work (via HF or vocational education)**
-

How to Decide?

Ask yourself:

- Do I enjoy studying and want to go to university later?
 - Do I prefer hands-on work?
 - What subjects do I enjoy the most?
 - Do I want to start working sooner?
-

If you'd like, I can help you narrow it down even further if you tell me:

- What subjects you like or are good at?
- Whether you want to go to university?
- If you prefer practical or academic learning?

Let me know, and we can build a plan that really fits you.
