I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've finished primary school—congratulations! 🎓 You're at an exciting point where you get to shape your future. Since you're in Denmark and you're 16, you now have several good options, depending on your interests, strengths, and career goals.

Here's a breakdown of your main **educational paths after primary school in Denmark**, along with some guidance:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for higher education (university or other advanced studies). Good if you're interested in academic subjects.

Main types:

- **STX (Almen studentereksamen)** – Broad academic focus (science, humanities, languages).
- **HTX (Teknisk studentereksamen)** – More technical and science/engineering-oriented.
- **HHX (Handelsstudentereksamen)** – Focus on business, economics, and marketing.
- **HF (Højere forberedelseseksamen)** – 2-year program, more flexible, suited if you want a shorter route to higher education.

Recommended if: You enjoy studying, want to go to university, or aren't sure yet and want to keep your options open.

♦ 2. EUD / EUX (Erhvervsuddannelser – Vocational Education and Training)

These are job-focused programs where you combine school and practical training (apprenticeship). You can become a carpenter, electrician, chef, health care worker, etc.

- **EUD:** Focuses more on work – great if you want to get a job quickly.
- **EUX:** Combines EUD with academic subjects, allowing you to continue to higher education if you want.

Recommended if: You like hands-on work and want to start a career quickly, or if university isn't your goal right now.

♦ 3. 10. klasse (Optional 10th Grade)

If you feel like you're not ready to choose just yet, or want to strengthen your skills before moving forward, you can do an extra year in **10. klasse**. Many schools offer this with extra focus on career guidance, internships, and personal development.

Recommended if: You're unsure what you want to do next, or want to improve your grades or confidence before entering youth education.

How to Decide?

Here are some questions to help you decide:

- Do you enjoy reading, writing, and academic work?
 - Or do you prefer doing things with your hands or being active?
 - Do you have any interests or dreams already (e.g. becoming a doctor, engineer, teacher, mechanic, entrepreneur)?
 - Are you motivated to continue in school for many more years, or would you like to work sooner?
-

My Personal Recommendation (based on what you've told me):

Since you're fluent in Danish and have just finished primary school, I recommend you **consider either 10. klasse or a gymnasial education (like STX or HHX)**—especially if you're not 100% sure yet what you want to do. These paths will **keep many doors open** and help you discover your interests more clearly.

If you already know you like working with your hands or a specific profession (like a chef, IT specialist, etc.), then **EUD or EUX** could be perfect.

If you tell me more about your **interests, favorite subjects, or dreams**, I can give you a more personalized suggestion. Would you like to do that?
