I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from El Salvador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—that helps a lot! At 16 and having finished primary school in Denmark (likely after completing **9th grade**), you're now at a key turning point. In Denmark, you have several good options depending on your interests, goals, and how academic or practical you want your next step to be.

Here's a breakdown of the **main educational paths** after 9th or 10th grade in Denmark:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university later.

a) STX (Almen studentereksamen)

- Broad, academic, and very flexible.
- Good if you like subjects like history, languages, science, or social studies.
- Ideal if you're unsure what you want to study later.

b) HHX (Højere handelseksamen)

- Focus on business, economics, marketing, and international trade.
- Great if you're interested in entrepreneurship, finance, or working with global companies (maybe even with ties to Latin America!).

c) HTX (Højere teknisk eksamen)

- Focus on science, technology, engineering, and math (STEM).
- Ideal if you enjoy tech, design, biology, chemistry, or engineering.

d) HF (Højere forberedelseksamen)

- A bit shorter (2 years) and more practice-oriented than the others.
- Suitable if you want a more direct route to certain higher education or professions (e.g., nursing, teaching, social work).

🔧 2. Erhvervsuddannelser (Vocational Education – EUD)

- Learn a trade while also doing some school work.
- You get practical training + a salary during the apprenticeship (praktik).
- Examples: electrician, carpenter, chef, social and health care worker, mechanic.

Bonus: You can later build on this with “EUX” if you also want the option to go to university. EUX combines vocational training **and** general subjects (like math, Danish, etc.).

3. EUX (Vocational + Academic Hybrid)

- Combines a regular vocational education (EUD) with upper secondary academic courses.
- A bit more demanding but gives you **both a trade and university access**.
- Great if you want practical skills but also want to keep your options open.

Given your background

Since you speak fluent Danish and have Salvadoran roots, you might want to think about paths that allow you to:

- **Use your cultural knowledge** (e.g., international business, diplomacy, development work)
- **Work abroad or with global companies** (HHX or STX might help here)
- **Use Spanish** as an asset (e.g., translation, trade, tourism, teaching)
- **Help people** (HF, social care EUDs, or healthcare-related education)

How to decide?

Ask yourself:

- Do I prefer hands-on work or academic study?
- Do I want to go to university someday?
- Do I have specific interests (e.g., tech, business, health, art)?
- Do I want to start earning money soon?

Final Thoughts / Recommendations:

Here are three tailored suggestions:

Path	Why Choose It?
STX	Great if you're not sure what you want yet but like academic subjects. Keeps your options open.
HHX	Ideal if you're interested in business, marketing, economics, or international relations.
EUX	Best of both worlds—learn a trade and still keep the door open for further education.

If you tell me more about your **interests** (e.g., favorite school subjects, hobbies, dream jobs), I can give more personalized guidance.
