I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bosnia and Herzegovina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're in an exciting position with a lot of possibilities ahead. Since you've just finished primary school in Denmark and you're 16, you're at the typical age to move into **youth education** (ungdomsuddannelse), which usually includes these main options:

🎓 Main Educational Paths in Denmark After Primary School

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are more academic and aimed at preparing you for university. Good if you're interested in continuing to higher education.

- **STX (Alment Gymnasium)** – Broad, academic program with a mix of science, humanities, and languages.
- **HHX (Handelsskole)** – Focus on business, economics, and marketing. Good if you're interested in commerce or international work.
- **HTX (Teknisk Gymnasium)** – Focus on science, technology, and innovation. Good if you like engineering, IT, or science.
- **HF (Højere Forberedelseseksamen)** – A 2-year option with fewer subjects; good if you prefer a shorter, more focused path to further education.

♦ Recommended if:

- You enjoy school and academic subjects.
- You're open to university or higher education in the future.
- You're still figuring out your exact career direction.

2. Vocational Education and Training (Erhvervsuddannelser / EUD)

This combines school and apprenticeship (praktik) in a company. You learn a profession directly.

- Examples: Electrician, carpenter, chef, IT supporter, healthcare assistant, mechanic.
- Takes 2–5 years depending on the program and specialization.

♦ Recommended if:

- You want to start working earlier and earn money during education.

- You like practical, hands-on work.
 - You have a specific job or trade you're interested in.
-

3. Combined Youth Education (EUX)

A mix of vocational training (EUD) and general upper secondary education (like STX). You get both a studentereksamen and a trade qualification.

♦ *Recommended if:*

- You want the flexibility of both higher education and job training.
 - You're practical but also want the option to go to university later.
-

Special Note on Your Background

Being fluent in Danish and coming from a multicultural background is a **huge advantage**. You could:

- Learn **Bosnian/Serbo-Croatian at a high academic level** — useful in EU/international work, diplomacy, NGOs, or translation.
 - Consider careers that connect Denmark with Southeast Europe (EU projects, international business, human rights, etc.).
-

How to Decide

Here are some helpful questions to ask yourself:

- Do I enjoy studying and want to continue to university?
 - Do I like hands-on work or practical experience?
 - Are there subjects or careers that really interest me already (e.g., science, business, health, IT)?
 - Would I rather work sooner or invest more years in education?
-

You Might Like...

If you tell me your interests (e.g., "I like biology and helping people" or "I want to start a business someday"), I can recommend more specific programs or job paths!

Would you like help exploring those options in more detail?
