I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself—it's great that you're thinking ahead about your future! Since you've just finished **primary school** in Denmark, you're likely around the stage where you're deciding between different upper secondary education options. In Denmark, there are several paths available after primary school (Folkeskole), and the best choice depends on your interests, strengths, and goals. Here's a breakdown to help guide you:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are good if you're considering **university** in the future.

- **STX (Studentereksamen)** – Broad academic program (humanities, science, social science). Great if you're unsure what you want to study later.
- **HHX (Higher Commercial Examination Programme)** – Focus on **economics, business, and languages**. Ideal if you're interested in international business or starting your own company.
- **HTX (Higher Technical Examination Programme)** – Focus on **technology and natural sciences**. Perfect if you like STEM (science, tech, engineering, math).
- **HF (Higher Preparatory Examination)** – A shorter, 2-year program. Suited for those who want a **more practical or flexible route** to higher education.

Recommended if:

You're interested in academic subjects and possibly pursuing a bachelor's degree later.

🔧 2. Vocational Education and Training (EUD / EUX)

This is great if you prefer **hands-on learning** or want to start working **soon after school**.

- **EUD** – Prepares you for a specific job (electrician, chef, carpenter, hairdresser, etc.).
- **EUX** – Combines EUD with academic subjects so you **can work or study further** (best of both worlds).

Recommended if:

You enjoy practical work, want to learn a trade, or want a job sooner. EUX is also great if you want the flexibility of later entering university.

Other Considerations

Since you're fluent in Danish and have an Armenian background:

- Consider studying **foreign languages, international relations, or global business** if you're interested in connecting your background with your future career.
- Take advantage of **exchange programs** or **international study opportunities** in Denmark—these can give you valuable experience and broaden your worldview.

My Suggestion Based on What You've Shared

If you enjoy learning and think you might want to go to university later, **STX** or **HHX** could be strong options. If you're more practically oriented or want to enter the workforce earlier, **EUX** is a fantastic hybrid path.

What to Do Next

1. **Talk to your school counselor** – they can help match your interests and grades to the right path.
2. **Visit open house events** (Åbent Hus) at local gymnasiums or vocational schools.
3. **Try a short internship (praktik)** to explore real work environments.

Would you like to tell me more about your interests (e.g., do you like science, people, business, design, etc.)? I can give a more specific recommendation based on that.
