I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nicaragua. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, living in Denmark, and just finished primary school (which I'll assume includes *folkeskole* up to 9th or 10th grade), you're at a key decision point. In Denmark, there are several main educational paths after primary school, depending on your interests, goals, and how you like to learn. Here's a clear breakdown of your options — and some advice tailored to your background and situation:

🎓 1. Gymnasium (STX, HHX, HTX, HF)

This is the typical academic upper secondary education lasting 2–3 years, which prepares you for university.

- **STX** (*Alment gymnasium*): General and broad academic program (good if you're unsure of what to study later).
- **HHX** (*Højere Handelseksamen*): Focus on business, economics, marketing – great if you're into commerce or entrepreneurship.
- **HTX** (*Højere Teknisk Eksamen*): Focus on science, tech, and innovation – good if you're into STEM subjects.
- **HF** (*Højere Forberedelseksamen*): Shorter (2 years), more practical, and suited for students who want to get to higher education quickly or need a more flexible structure.

✅ *Good for you if:*

You enjoy academic subjects, want to go to university later, or are still figuring out what you like. STX is the most general and gives you many future options.

🔧 2. EUD / EUX – Vocational Education and Training

This is more hands-on and job-focused. You get a skilled trade (e.g., electrician, carpenter, hairdresser, chef, health worker, etc.).

- **EUD**: Focuses mainly on working after the program.
- **EUX**: A combo of vocational training and academic studies — so you get both a trade and the option to go to university.

✅ *Good for you if:*

You like practical work and want a faster path to a job, but might still want the chance to study further

later. EUX is very flexible and respected.

3. International Options / Study Abroad

Given your Nicaraguan background and fluent Danish, you have a multicultural edge. You could consider:

- **International Gymnasium (e.g., IB - International Baccalaureate)** in Denmark
- Summer language or study programs in Spain or Latin America (Spanish skills are valuable!)
- Exchange year abroad, which Denmark supports in many cases

 *Good for you if:*

You're globally minded, enjoy languages or international culture, or think about working or studying outside Denmark someday.

How to Choose?

Ask yourself:

- Do I want a **university degree** later? (Go for STX/HHX/HTX/HF or EUX)
- Do I prefer **hands-on learning** and getting into a job soon? (EUD or EUX)
- Do I like **math, science, business, languages, or social issues**?
- Do I want to **travel or use my Spanish/Danish skills** in the future?

Recommendations Based on You:

- **If you're unsure** and want to keep all doors open: → STX (general gymnasium) is a safe, flexible choice.
- **If you like business or international work:** → HHX or EUX Business could be a great path.
- **If you're practical and want a trade but still want options later:** → EUX is ideal.
- **If you're really into science/tech:** → HTX.

Bonus Tips:

- **Talk to a UU-vejleder** (youth guidance counselor) – they can help you explore your strengths.
- Visit **education fairs** and **open houses** at gymnasiums or technical schools.
- Use Denmark's **UG.dk** site to explore programs in detail: <https://www.ug.dk>

Would you like help comparing some specific schools or programs near where you live in Denmark? If you tell me your city or region, I can narrow it down.
