I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great that you've completed primary school—congratulations! 🎉 At 16 in Denmark, you're at a natural transition point in your education, and you have several solid paths you can choose from depending on your interests, goals, and strengths.

Here's an overview of your main options, along with some thoughts on who each path might suit best:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university.

Main types:

- **STX (Studentereksamen):** Broad and academic, with a mix of humanities, sciences, and social studies.
- **HHX (Højere Handelseksamen):** Focused on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focused on technology, science, and innovation.
- **HF (Højere Forberedelseksamen):** Shorter (2 years), a bit more practical, for those who may not want 3 years of gymnasium.

Recommended if:

You enjoy studying, are open to academic subjects, and want to go to university later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Practical and job-focused education combining school and apprenticeships.

Examples:

- Electrician, carpenter, hairdresser, chef, mechanic, IT supporter, healthcare assistant, etc.

Recommended if:

You want to learn a trade or start working sooner, or if you enjoy hands-on, practical work.

🧩 3. Kombinationsforløb (EUX)

A combination of vocational training **and** a gymnasial-level academic education.

Recommended if:

You want the security of a skilled trade **plus** the option to study at university later. It's a demanding path but gives lots of flexibility.

How to Choose?

Here are a few questions to guide you:

- Do you like working with your hands or with your head?
 - Do you prefer theory (reading, writing, thinking) or practice (doing, building, creating)?
 - Are there specific careers you're already thinking about?
 - Do you want to start earning money and working sooner, or do you want to study longer and aim for a professional career?
-

Example Paths:

- **Want to be a doctor or lawyer?** → STX or HF → University.
 - **Interested in starting a business or studying economics?** → HHX → Business school or university.
 - **Love tech, engineering, or science?** → HTX → Technical university or college.
 - **Want to be a carpenter, mechanic, or chef?** → EUD → Apprenticeship and skilled work.
 - **Want both a skilled trade and academic options?** → EUX.
-

If you share more about what you enjoy (subjects, hobbies, career dreams), I can help narrow it down even more.

Also: you're multilingual and bicultural, which can be a huge asset in education and work—don't underestimate that!
