I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Czechia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself—you're in an exciting stage of life with many options ahead! Since you're 16, just finished primary school in Denmark, and are fluent in Danish, you're at the typical age where students decide between several educational paths in the Danish system.

Here's a breakdown of your main options and some tailored recommendations based on common goals and interests:

## Main Educational Paths After Primary School in Denmark

### 1. Gymnasiale Uddannelser (Upper Secondary Education)

These programs are generally 3 years long and prepare you for higher education (university or similar). There are several types:

- **STX (Almen Studentereksamen)** – Broad, academic, includes humanities, sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and IT.
- **HF (Højere Forberedelseseksamen)** – 2-year program, more practical/theoretical mix, suited for those who want a shorter route to higher education.

#### ✓ Recommended if you:

- Want to go to university or keep your options open.
- Enjoy academic learning.
- Aren't yet sure what field you want to work in.

### 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These combine school with apprenticeships. Programs typically last 3–5 years depending on the trade. Examples: Electrician, chef, carpenter, IT-supporter, hairdresser, social care helper.

#### ✓ Recommended if you:

- Prefer practical, hands-on work.

- Want to earn while you learn.
  - Want to get a job fairly soon after school.
- 

### 3. Kombineret ungdomsuddannelse (KUU) or Produktionsskole / FGU

These are for students who need a more flexible or supportive path before moving into a vocational or academic track.

#### Recommended if you:

- Feel unsure or unready for a full gymnasium or EUD.
  - Want time to explore what you're good at.
- 

### How to Choose?

Here are a few questions to ask yourself:

- Do I enjoy academic subjects or hands-on work more?
  - Do I want to go to university one day?
  - Am I interested in a specific field (e.g., tech, healthcare, business)?
  - Do I want to start earning money sooner or invest in longer studies first?
- 

### Example Scenarios (for inspiration)

**Scenario A: You like school, especially science or social studies, and might want to go to university**

→ Consider STX or HTX.

**Scenario B: You're into business or want to start your own company one day**

→ Consider HHX.

**Scenario C: You love working with your hands, machines, or want to become a chef or IT technician**

→ Go for an EUD program in your interest area.

---

### Extra Advantage for You

Your Czech background could be a huge asset. If you're fluent or learning Czech, it could help you in international business, translation, or cross-cultural work between Denmark and Czechia later on. Some HHX or STX programs might even allow you to add Czech as an elective or through private studies.
