

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Honduras. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps a lot. You're actually in a good position: fluent in Danish, raised in Denmark, but with international roots, which can give you some advantages down the line.

Since you just finished primary school in Denmark (grundskolen / folkeskole), you're probably at the point where you're choosing between the main secondary education paths. Let me give you an overview with some thoughts:

1 Gymnasiale uddannelser (Upper Secondary Education)

If you're more academically oriented, these could be a strong option:

- **STX (Almen studentereksamen)**
Good if you like a broad range of subjects (Danish, languages, history, sciences).
- **HHX (Højere handelseksamen)**
Focus on business, economics, and languages. Might be good if you're interested in international business — especially considering your bilingual background.
- **HTX (Højere teknisk eksamen)**
Focus on technical and natural sciences (IT, technology, engineering, biology, etc.).
- **HF (Højere forberedelseseksamen)**
Shorter (2 years), more practice-oriented, for students who might want to move faster towards a profession or further education.

✓ Best if you:

- Want to keep university options open
- Are academically motivated
- Enjoy studying different subjects

2 Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more hands-on and want to get into the job market earlier:

- You combine school and apprenticeship
- Wide range of areas: business, health, technology, crafts, IT, etc.

- Many of these lead directly to good jobs.

✓ *Best if you:*

- Prefer practical learning
 - Already have a sense of a profession you want to pursue
 - Want to work and earn money earlier
-

3 Combination programs (EUX)

- A mix of vocational training + academic education
- Allows you to learn a trade but still qualify for university later

✓ *Best if you:*

- Want both practical skills and academic possibilities later
-

A few personal thoughts based on what you've told me:

- Your bilingual / multicultural background might be very valuable if you pursue something with languages, international business, or global relations.
 - HHX or STX could open a lot of doors if you're still unsure exactly what you want.
 - If you're more hands-on or already know you like working with tech, healthcare, or a specific craft, EUD or EUX could be great.
-

👉 My quick recommendation (if you're unsure):

STX or HHX — they keep the most doors open while you explore your interests further.

If you tell me a bit more:

- What subjects do you enjoy?
- Do you like schoolwork, or do you prefer more practical work?
- Any career dreams yet?

— then I can give you a much more tailored suggestion. Shall we? 😊
