I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Moldova. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big moment in your life – congratulations on finishing primary school! Since you're 16, fluent in Danish, and living in Denmark, you now have a few solid educational options depending on your interests, goals, and future career ideas.

Here's a breakdown of your main options after primary school in Denmark:

## 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are for students who want to continue to higher education (like university).

### Main options:

- **STX (Studentereksamen)** – General academic program with a mix of humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade. Good if you're interested in business or finance.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and innovation. Ideal if you're interested in engineering, IT, or natural sciences.
- **HF (Højere Forberedelseksamen)** – A shorter, more practical 2-year program aimed at adults and students who prefer a more flexible approach.

 **Recommended if:** You want to keep your options open, enjoy academic learning, or are thinking about going to university later.

## 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These programs combine school with apprenticeship in a company. You learn a profession while earning money.

### Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Social and health care worker (SOSU)

There are hundreds of different trades and specialties.

● **Recommended if:** You prefer practical, hands-on work and want to start earning earlier. Also a good path if university isn't your goal.

### 3. EUX (Vocational + Academic)

EUX combines vocational training with academic classes. It allows you to both learn a trade *and* qualify for university later.

● **Recommended if:** You want a practical education *and* want to keep your options open for higher education.

### What to Think About When Choosing

- What subjects do you enjoy most?
- Do you learn best by reading and writing, or doing and trying?
- Are you interested in going to university later?
- Do you want to start working soon or keep studying?

### Special Note: With Moldovan Roots

Being bilingual or multicultural can be a great strength. If you're interested in international studies, language programs, business, or diplomacy, you could really stand out in those fields.

### Practical Step: Visit an "UU-vejleder"

In Denmark, you can talk to a **UU-vejleder** (Ungdommens Uddannelsesvejledning) who helps students choose their next step. They can give you personal advice based on your interests and grades.

### Example Paths

Here are a few examples based on different interests:

Interest	Recommended Path
Science/Technology	HTX or EUX (technical line)
Business/Economics	HHX or EUX (business line)
Helping others (health)	EUD SOSU or HF (health line)
Academic learning	STX or HF
Hands-on work	EUD (like electrician, mechanic, etc.)
Want flexibility	EUX (best of both worlds)

Would you like help narrowing down your options based on what you enjoy or want to do in the future? I can help guide you more specifically.
