I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you've just finished **primary school in Denmark** (which usually ends after 9th grade), you're at a key moment where you can choose from several educational paths. The best option depends on your **interests**, **skills**, and **future goals**. Here's a breakdown of your main choices in Denmark, along with suggestions based on different types of interests:

## 🎓 1. Gymnasiale Uddannelser (Upper Secondary Education – General)

These prepare you for **university or other higher education**. There are several types:

### ➤ STX (Alment Gymnasium)

- Focus: Broad academic education – languages, social sciences, natural sciences.
- Best if you enjoy school subjects and want to keep your options open for university.
- Length: 3 years.

### ➤ HHX (Handelsgymnasium)

- Focus: Business, economics, marketing, languages.
- Best if you're interested in business, finance, or management careers.
- Length: 3 years.

### ➤ HTX (Teknisk Gymnasium)

- Focus: Technology, science, engineering, IT.
- Great if you're into tech, programming, or sciences.
- Length: 3 years.

### ➤ HF (Højere Forberedelseksamen)

- More practical and shorter (2 years).
- Best for more mature students or those who prefer a lighter academic load but still want to go to university.

## 🔧 2. Erhvervsuddannelse (Vocational Education and Training - EUD)

If you prefer **hands-on learning** and want to get a job **right after school**, this might suit you.

- You combine **school and apprenticeship**.
- Areas include construction, health care, IT, cooking, mechanic work, etc.
- You can start working after a few years, or go on to take more education later (e.g. **EUX** if you want both a vocational diploma and access to higher education).

### 3. EUX – A Combination Option

- Combines vocational training with academic studies.
- Takes longer (around 4 years), but gives you **access to university** and **job skills**.
- Perfect if you want both a **backup plan** and **practical experience**.

## How to Decide?

Here are some guiding questions:

Question	If Yes...	Consider
Do you like academic subjects and maybe want to go to university?	Yes	STX, HHX, HTX
Do you want to start working sooner and learn by doing?	Yes	EUD
Are you interested in both work and study options?	Yes	EUX
Do you enjoy science or technology?	Yes	HTX or EUX (tech-oriented)
Do you enjoy economics or languages?	Yes	HHX or STX
Do you want a shorter, more focused program?	Yes	HF or EUD

## My Recommendation (Based on Your Background)

Since:

- You're fluent in Danish,
- You've grown up in Denmark,
- You're just finishing 9th grade,

You probably have access to **all these paths**. If you're **undecided**, **STX** is often the safest and broadest path – it gives you the most flexibility. But if you know you like **tech**, **HTX** could be a great option. And if you prefer **practical learning**, **EUX** might be perfect.

## Next Steps

- **Talk to your school counselor (studievejleder)** – they can help you pick a program and even arrange visits to schools.
- **Visit open house events** at local gymnasiums or vocational schools.

- Try out “brobygning” (bridge-building program) – a short trial period at different types of schools.
- 

If you tell me more about your interests (e.g. what subjects you liked most, your hobbies, if you want to go to university, or if you like working with your hands), I can give a more specific recommendation.
