I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! It's great that you're fluent in Danish and have completed primary school. In Denmark, after primary school (folkeskole), you have several good educational paths to choose from, depending on your interests, strengths, and future goals. Here's a breakdown of your main options:

## 1. General Upper Secondary Education (Gymnasiale uddannelser)

If you're interested in **going to university later**, this is the best route.

### Main options:

- **STX (Studentereksamen)** – broad academic subjects (languages, science, history).
- **HHX (Højere Handelseksamen)** – focused on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – focused on technology and science.
- **HF (Højere Forberedelseksamen)** – shorter, 2-year program with more practical focus.

### Recommended if:

- You enjoy academic work.
- You're interested in university or college.
- You're not yet sure what you want, but want to keep doors open.

## 2. Vocational Education and Training (Erhvervsuddannelser / EUD)

If you'd rather **learn a trade or start working sooner**, this is a strong option.

You combine school and apprenticeship in fields like:

- Electrician
- Hairdresser
- Carpenter
- Mechanic

- Health and care worker
- IT supporter

#### Recommended if:

- You like hands-on work.
- You want a clear path to a job.
- University isn't your goal right now.

### 3. EUX – The Combined Path

This combines vocational training (EUD) with academic subjects (like gymnasium). It takes a bit longer but gives you:

- A trade qualification **and**
- The possibility to go to university

#### Recommended if:

- You want a profession (like electrician or IT technician) but also want the option to study later.

### 4. 10th Grade (10. klasse)

If you're unsure what to choose or want to improve your grades, you might take one more year before deciding.

#### Recommended if:

- You feel unsure about your next step.
- You want to improve academically or personally.
- You want more time to explore options.

### What to Think About

To choose the best path, consider:

- **What subjects do you enjoy?**
- **Do you prefer practical or academic learning?**
- **Do you want to go to university or work soon?**
- **Do you feel ready, or would an extra year (10th grade) help?**

If you tell me more about your interests (e.g. do you like working with people, technology, science, business, art?), I can help you narrow it down even further.
