I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Poland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—you're in an exciting place in life with lots of opportunities ahead. Since you're 16 and just finished primary school in Denmark, you're at the stage where you choose between different **youth education programs**. Here are your main options in Denmark, along with suggestions based on different interests and goals:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

This path prepares you for higher education like university.

- **STX (Studentereksamen)**: Broad academic focus – humanities, natural sciences, social sciences.
- **HHX (Højere Handelseksamen)**: Business and economics focus – good if you're interested in commerce or entrepreneurship.
- **HTX (Højere Teknisk Eksamen)**: Focus on technology and science – ideal if you like engineering, IT, or technical subjects.
- **HF (Højere Forberedelseksamen)**: A shorter, more flexible program (2 years) – often used if you want quicker access to higher education or need a different learning environment.

 *Recommended if:*

You enjoy academic learning and think you might want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EUX)

This combines school with practical training in a company (apprenticeship). There are many tracks, such as:

- Crafts (carpenter, electrician, etc.)
- Health and care (e.g., social and health assistant)
- Business and retail
- IT and technology

There are two main versions:

- **EUD**: Mainly focused on getting a job after.
- **EUX**: Combines vocational training with general education – allows you to apply to university later.

 *Recommended if:*

You prefer hands-on learning or want to start working earlier while keeping future doors open.

International Opportunities

Given your Polish roots, you're in a great position to explore international paths too:

- **Take a gap year:** Learn more about what you enjoy through work, volunteering, or travel.
 - **Study Polish:** Strengthening your Polish language could be useful later for working or studying in Poland or working in international companies.
-

How to Decide?

Ask yourself a few questions:

- Do I enjoy academic subjects and exams? → Consider **STX/HTX/HHX**.
 - Do I learn better by doing and want a faster way to get into work? → Consider **EUD/EUX**.
 - Do I want to keep my options open for both work and higher education? → Consider **HTX** or **EUX**.
 - Am I unsure and want a flexible or shorter option? → Consider **HF**.
-

Final Tip:

Visit **open house events (åbent hus)** at local schools or attend **education fairs** like *Uddannelseskaravanen*. Talking to teachers, students, and career advisors can help a lot.

If you tell me more about your interests (e.g., do you like science, business, helping people, working with your hands, art, etc.), I can give a more specific recommendation.
