I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—that gives a good foundation for thinking about your next step. In Denmark, after finishing **primary school (folkeskole)**, you typically have a few main educational paths depending on your interests, academic strengths, and career goals. Here's a breakdown of the main options and some personalized guidance:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are suited if you're aiming for university later on.

Options:

- **STX (Studentereksamen):** Broad and academic, includes humanities, sciences, and social sciences.
- **HHX (Højere Handelseksamen):** Focused on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focus on science, technology, and innovation.
- **HF (Højere Forberedelseksamen):** A 2-year program, more practically oriented, often for students who want to enter certain professions or adult education.

✅ Recommended if:

You enjoy academic work and are considering higher education (like university or professional schools).

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Combines school with apprenticeship in a company. You graduate with practical skills and can start working or continue with more education.

Examples:

- Electrician, mechanic, carpenter, hairdresser, healthcare assistant, etc.

✅ Recommended if:

You prefer hands-on learning, want to enter the workforce sooner, or like working with specific trades.

🏠 3. Kombinerede uddannelser (EUX)

This combines vocational training (EUD) with a general upper secondary education (like STX). You get both a trade qualification **and** the academic level to enter university.

✓ **Recommended if:**

You want practical skills *and* keep the door open for higher education.

How to Decide?

Here are some questions to help narrow it down:

- Do you enjoy school subjects and want to keep studying at a high academic level? → **STX, HTX, HHX**
- Do you prefer practical, hands-on work and want to learn a trade? → **EUD**
- Do you want both practical skills and future university options? → **EUX**
- Are you unsure, but want to keep your options open? → **STX or EUX**

As someone fluent in Danish with a multicultural background:

- **Language skills** can be a huge asset in business, tourism, international studies, and public service.
- You might also consider programs that support **global understanding**, like international lines in STX or HHX.
- If you're open to it, **study abroad exchanges** or multicultural programs can also help you connect with both Danish and Palauan identities.

Next Step:

- Visit **uddannelsesguiden.dk (UG.dk)** – Denmark's official education guide.
- Talk to a **UU-vejleder (youth education counselor)** at your school or local municipality.
- Visit **open house events** at gymnasiums or vocational schools nearby.

Would you like help narrowing this down based on your interests (e.g., do you like science, business, arts, tech, etc.)? I can help you explore some realistic and exciting paths based on that.
