

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your situation — you're actually at a great turning point, so it's very smart of you to think carefully.

Since you just finished primary school in Denmark (which usually means 9th or 10th grade depending on your path), your next step typically depends on:

- Your interests
- Your strengths (academic, practical, creative, etc.)
- Your long-term goals (career, university, job, etc.)

Let's go through a few good options in Denmark's education system, based on your situation:

1 Gymnasiale uddannelser (Upper Secondary Education)

These are the most common next steps if you're academically strong and possibly aiming for higher education later.

- **STX (Almen studentereksamen):**
Broad academic program — good if you're still unsure exactly what to do, but want options open for university. You get languages, science, humanities, and social science.
- **HHX (Handelsgymnasium):**
Focuses more on business, economics, marketing. Great if you're interested in international business, finance, or entrepreneurship.
- **HTX (Teknisk gymnasium):**
More technical and science-oriented. Great if you're into IT, technology, science, or engineering.
- **HF (Højere forberedelseseksamen):**
A bit shorter (2 years). More practically oriented but still allows access to university. Great if you prefer a less theoretical approach.

2 EUD / EUX (Erhvervsuddannelser / Vocational Education)

If you're more interested in getting into the workforce sooner, or if you like working with your hands, learning a trade, or doing something practical:

- **EUD:** Focuses directly on trades like electrician, carpenter, chef, hairdresser, etc.

- **EUX:** Combines vocational training with academic subjects — gives you both a trade and access to higher education later.
-

Other options (less common, but worth considering)

- **International programs:** Since you have roots from Georgia, and you speak Danish fluently, an international angle could be useful — e.g. International Baccalaureate (IB).
 - **Language or cultural programs:** You might have an advantage if you can combine your Danish, Georgian, and possibly English skills in areas like translation, diplomacy, or international business.
-

My recommendation based on what you said

Since you're bilingual, young, and just finished primary school, I would lean toward:

 **STX or HHX**, unless you already know you want a trade.

- If you're strong in academics and want to keep options open: STX.
- If you like business, international opportunities, or economics: HHX.

Both will give you 3 years of good education and keep your future options flexible.

If you want, you can tell me a bit more:

- What subjects do you enjoy?
- Do you prefer practical or theoretical learning?
- Any career ideas (even vague ones)?

 With a little more info, I can give you a much more tailored recommendation.
