I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from China. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot. Since you've just finished primary school in Denmark and you're fluent in Danish, you have several good options ahead. What's best for you depends on your interests, strengths, and long-term goals. I'll outline the main paths available to you in the Danish education system after primary/lower secondary school (Folkeskole):

## 🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in continuing with academic studies, aiming for university or higher education, one of the gymnasiale uddannelser is likely the right choice. There are a few types:

### ➤ STX (Almen studentereksamen) – General upper secondary

- Broad academic focus (humanities, natural sciences, social sciences).
- Good if you're still exploring your interests or want flexibility for university later.

### ➤ HTX (Teknisk studentereksamen) – Technical upper secondary

- Focus on science, technology, and engineering.
- Great if you're into STEM fields or considering technical studies.

### ➤ HHX (Højere handelseksamen) – Business-oriented upper secondary

- Focus on business, economics, and languages.
- Good if you're interested in commerce, finance, or international trade.

### ➤ HF (Højere forberedelseksamen) – Shorter, practical focus

- 2-year program (after 10th grade).
- More practical and adult-oriented.
- Good if you're more mature or want to enter professions like nursing, teaching, or police.

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training, VET/EUD)

If you're more interested in hands-on work and want to start a career earlier:

- Combines school with apprenticeship in a company.
  - Leads to qualifications in trades like electrician, mechanic, chef, carpenter, etc.
  - You can also build on a vocational education later with more studies (e.g. EUX – combining vocational and academic studies).
- 

### 3. International Options

Given your Chinese background and Danish fluency, you might consider:

- **IB (International Baccalaureate)** – Offered at some gymnasiums; in English and internationally recognized.
  - Could be useful if you're thinking about studying abroad or want an international career.
- 

### How to Choose?

Ask yourself:

- Do I enjoy academic subjects and want to go to university later? → STX, HTX, HHX, IB.
  - Do I want to start working sooner and learn hands-on skills? → EUD or EUX.
  - Am I interested in science/technology? → HTX.
  - Business and economics? → HHX.
  - Still figuring things out, but want to keep options open? → STX.
- 

### Also consider:

- **10th grade** (10. klasse) – optional, but can help you get ready for upper secondary education.
  - **Efterskole** – a special kind of boarding school for one year, great for personal growth, especially if you want to explore something like music, sports, or creativity.
- 

If you tell me more about your interests, strengths in school (like math, languages, or arts), or what kind of career you're thinking about, I can give you more tailored advice.

Would you like help exploring career options too?
