I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Micronesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great to hear, and congratulations on finishing primary school!

Since you're 16 and living in Denmark, you're at an important point in your education — and Denmark offers several good options after primary school (folkeskole). Your next step depends on your interests, strengths, and future goals (like whether you're interested in university, a trade, or starting work earlier). Here's a breakdown of your main options:

## 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university. There are different types, depending on your interests:

- **STX (Studentereksamen)** – Broad and academic, includes humanities, natural sciences, and social sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Focus on science and technology.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), good if you're unsure or want to go to a professional college later.

● **Choose this if:** You want to go to university later or enjoy academic subjects like science, languages, or economics.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is a mix of school and apprenticeship. You learn a profession and usually work part-time in a company.

- Examples: Electrician, hairdresser, chef, carpenter, healthcare assistant.
- Takes 2-5 years depending on the field.

● **Choose this if:** You want to start working sooner and enjoy hands-on learning.

## 3. EUX (Vocational + Academic Combined)

This is a special program where you get both a vocational education and a high school-level diploma, so you can both work *and* study further.

● **Choose this if:** You want the flexibility of working in a trade, but also want the option to go to university later.

---

### **A Few Other Things to Consider:**

- **Language Skills:** If you're fluent in Danish and interested in international opportunities, adding strong English or other language skills can be a big advantage.
  - **Micronesian Heritage:** If you're interested, there may be international or cultural programs (exchange, NGOs, or university paths) where your background is a strength.
  - **Counseling Help:** In Denmark, *UU-vejledningen* (Ungdommens Uddannelsesvejledning) can help you decide what fits best for your profile. It's free and made for people in your situation.
- 

### **What You Can Do Now:**

1. Think about what subjects or activities you enjoy most.
  2. Talk to a UU vejleder (education counselor).
  3. Visit open house events at local *gymnasier* or vocational schools.
  4. Try a "brobygning" (bridging course) – short trial periods in different education paths to see what fits you.
- 

If you'd like, I can help you explore specific schools or programs near where you live. Just let me know your city or region.
