I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—it's great that you're thinking carefully about your next steps. Since you're 16 and just finished primary school in Denmark, you're likely at the point of choosing your upper secondary education path, which is an important stage before higher education or entering the workforce.

Here are the **main educational paths** available to you in Denmark after primary school (folkeskole), along with recommendations depending on your interests and goals:

♦ 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These programs prepare you for university and other higher education.

A. STX (Studentereksamen) – Most academic and broad

- Best if you're interested in subjects like humanities, science, social science, or languages.
- 3 years.
- Prepares you for university (e.g., Aarhus, KU).

B. HHX (Higher Commercial Examination Programme)

- Focuses on business, economics, and international trade.
- Great if you're interested in working in business, finance, or entrepreneurship.

C. HTX (Higher Technical Examination Programme)

- Focuses on science, technology, engineering, and math (STEM).
- Good if you're interested in engineering, IT, biotech, or design.

D. HF (Higher Preparatory Examination Programme)

- Shorter (2 years), more practical.
- Suitable if you want to go to higher education but don't want 3 years of upper secondary.
- Can be a second chance for those who didn't get high marks or want to switch.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school with hands-on training (apprenticeships).
- Great if you want to become a carpenter, electrician, hairdresser, chef, healthcare assistant, or mechanic.
- Leads to employment or can be a pathway to *EUX* (which combines vocational and academic education).

♦ 3. **EUX – Dual Path (Vocational + General Upper Secondary)**

- Combines EUD (vocational) with academic studies.
- Takes a bit longer but gives you both a trade qualification *and* access to university.
- Excellent if you want job skills + future education flexibility.

Recommendations Based on You:

Since you're fluent in Danish and have cultural roots in Mauritius, here are a few thoughts:

If you like studying and want to go to university:

- **STX** is the most flexible and broad option. Great if you're still exploring your interests.
- **HHX** could be a strong choice if you're interested in international business, especially with your multicultural background.

If you enjoy hands-on learning or want to start working earlier:

- **EUD** (like becoming a chef, mechanic, or IT technician) is a smart, respected route.
- **EUX** is ideal if you want both hands-on skills and the option to study at university later.

What You Can Do Now:

1. **Visit an "uddannelsesmesse" (education fair)** – you can meet students and teachers from different schools.
2. **Book a meeting with an "UU-vejleder" (Youth Guidance Counselor)** – they can help you map your interests and options.
3. **Try a "brobygning" program** – short trial courses that let you test different schools or educations.

If you tell me more about your interests (e.g., subjects you enjoy, hobbies, career dreams), I can give you even more tailored advice.

Would you like to explore options like international studies, creative fields, tech careers, or something else?
