

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liechtenstein. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've just finished primary school—congratulations! Since you're fluent in Danish and living in Denmark, you have several solid education paths to choose from depending on your interests, strengths, and long-term goals. Here's a breakdown of your main options after primary school in Denmark:

♦ 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic paths that prepare you for university. Best if you're interested in subjects like science, languages, social studies, or humanities.

Types:

- **STX (Studentereksamen):** General academic education with a wide range of subjects.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focus on technical subjects like IT, natural sciences, and technology.
- **HF (Højere Forberedelseseksamen):** A shorter, more flexible 2-year program. Good for more mature students or those wanting a quicker path to further education.

Best for you if: You like school-style learning, enjoy academic subjects, and think you may want to go to university later.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – VET/EUD)

This is a more hands-on path, where you combine school and apprenticeship in a company. It leads to a skilled trade or profession.

Examples of programs:

- Electrician
- Carpenter
- Hairdresser
- Chef
- IT-supporter
- Social and health care assistant (SOSU)

Best for you if: You prefer practical learning, want to enter the job market earlier, and like working with your hands or helping people.

♦ 3. Kombinerede Uddannelser (Combination Programs)

There are also **EUX-programs**, which combine VET with academic subjects, giving you both a vocational qualification **and** eligibility for university.

Best for you if: You want both practical training and the option to pursue further studies.

♦ 4. International Options

With your Liechtenstein background, you might consider:

- **International Baccalaureate (IB):** An English-language academic program recognized worldwide.
- Studying abroad later on (e.g., in Liechtenstein, Switzerland, Austria, etc.)—you might have cultural or language ties to those places.

Best for you if: You're aiming for international university studies or careers, or want to keep your options very open.

Recommendations Based on Your Info:

Since you're fluent in Danish, born and raised in Denmark, and just finishing primary school, here are some tailored suggestions:

- If you're still figuring out your interests, **STX** or **HHX** might be a good general path to keep many options open.
 - If you're more practical and want to start learning a trade, consider a **VET** program or **EUX** for flexibility.
 - If you're ambitious and confident in English, the **IB** could be a great springboard to international opportunities.
-

What You Should Consider:

Ask yourself:

- Do I enjoy academic learning or hands-on work?
- Do I want to go to university?
- What subjects or activities excite me most?
- Do I want to work right after school, or study more?

If you'd like, I can help you explore schools or specific fields based on your interests (e.g., science, tech, art, business). Would you like to share more about what you enjoy or what kind of future you imagine?
