

# Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Hungary. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about your background — that helps a lot. Since you're 16, just finished primary school, and are fluent in Danish, you're at a typical point for choosing your upper secondary education in Denmark. Let me walk you through some realistic options and recommendations based on your situation:

## 1 General Upper Secondary Education (Gymnasiale Uddannelser)

If you're academically interested and may want to attend university later:

- **STX (Almen Studentereksamen)**  
*Focus:* Broad academic education (languages, science, humanities, social sciences).  
*Good if:* You're not yet sure what you want to study, or want to keep doors open for many types of higher education.
- **HHX (Higher Commercial Examination Programme)**  
*Focus:* Business, economics, international trade, marketing.  
*Good if:* You're interested in business, finance, or international relations (especially valuable with your Hungarian background).
- **HTX (Higher Technical Examination Programme)**  
*Focus:* Technology, IT, science, engineering.  
*Good if:* You enjoy science, technology, or engineering-related subjects.
- **HF (Higher Preparatory Examination)**  
*Focus:* A bit shorter (2 years), often more practical or for those who want to enter professional training or higher education but prefer a more flexible system.  
*Good if:* You prefer a more practical or less theoretical approach.

## 2 Vocational Education and Training (Erhvervsuddannelse, EUD)

If you're more interested in getting practical skills and entering the job market earlier (or through apprenticeships):

- Fields include: electrician, IT support, carpentry, social care, healthcare, chef, and many more.
- You can still continue to higher education later via *eux* (a combined vocational and academic programme).

### 3 Special International Angle

Since you have a Hungarian background, you could also consider:

- **Studying Danish-Hungarian relations, language, or international business in the future.**  
You could, for example, later leverage your bilingual ability.
  - **Exchange years or international schools** (if you're considering becoming very internationally oriented).
- 

### My personal recommendation:

Since you're fluent in Danish, have an international background, and are still young:

- **STX or HHX** might be your strongest options if you want to keep a broad range of opportunities open.
  - If you have strong interest in tech or engineering: **HTX**.
  - If you prefer a quicker, more practical route: **EUD with EUX option**.
- 

If you tell me a bit more (e.g. your interests, whether you like math, languages, business, tech, or hands-on work), I can give you a much more tailored recommendation.
