I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and have completed primary school in Denmark, you're at a key decision point. Denmark offers several great options for continuing education depending on your interests, strengths, and career goals. Let me break down your main choices and give some tailored suggestions:

## 🎓 Your Main Educational Paths After Primary School in Denmark

### 1. Gymnasiale Uddannelser (General Upper Secondary Education)

This is for you if you enjoy academic subjects and might want to go to university.

- **STX (Alment Gymnasium)** – Broad and academic. Great if you're unsure what you want to do yet.
- **HHX (Higher Commercial Examination Programme)** – Focuses on business, economics, and marketing.
- **HTX (Higher Technical Examination Programme)** – Focuses on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), often for those who are more mature or want to go to university a bit faster.

**Recommended if:** You enjoy school subjects like languages, science, or business, and might want to pursue a university degree later.

### 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

A mix of school and apprenticeship. You learn a trade and work in a real job setting.

- Examples: Electrician, carpenter, hairdresser, mechanic, social care worker, etc.
- You get paid during your apprenticeship and can start working right after.

**Recommended if:** You like hands-on work, want to earn money while you learn, and are interested in a specific job.

### 3. Kombinationsforløb (EUX)

A hybrid between gymnasium and vocational education. You get both a vocational qualification **and** a gymnasium-level exam.

- You can go straight to work or study at university afterward.
- It's more demanding than EUD or a regular gymnasium, but very flexible.

**Recommended if:** You're hard-working, want a broad set of options, and aren't sure if you want to go to university or work.

## Other Personal Factors to Consider

- **Paraguayan background:** You could leverage your bilingual or multicultural background for careers in international business, diplomacy, translation, or education.
- **Danish fluency:** That's a strong advantage in almost every field in Denmark.
- **Passions & Interests:** What subjects or activities do you enjoy the most?

## My Recommendation Based on What You Shared:

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, you probably just finished **9. klasse**. Here's a good path if you're still exploring:

✅ **Try a 10. klasse if you're unsure** – This gives you another year to mature, explore, and prepare for the next step (optional, but helpful).

Then choose based on what fits you:

- **If you like school and might go to university:** Go for **STX** or **HTX** depending on if you like science or general subjects.
- **If you want a job soon and like practical work:** Choose a **vocational education (EUD)**, or go for **EUX** to keep university doors open too.

## Next Steps for You

1. **Talk to your school's guidance counselor (Studievejleder)** – They can help match your interests to a path.
2. **Try a praktik (internship)** in different areas – many schools offer this, and it's a great way to test careers.
3. **Visit educational fairs (Uddannelsesmesser)** or open houses at gymnasiums and vocational schools.

If you tell me more about what you like (subjects, hobbies, career dreams), I can give you a more specific recommendation too!
