I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've finished primary school — congratulations! At 16 and living in Denmark, you're at a key moment where your decisions can shape your future, but remember: nothing is final. You can always adjust your path later.

Here's a breakdown of common educational paths in Denmark after primary/lower secondary school (Folkeskole), with suggestions based on different interests and goals:

---

## 1. Gymnasiale uddannelser (Upper Secondary Education)

This is a typical choice if you're interested in continuing to higher education (university). There are different types:

### a. STX (Studentereksamen)

- General upper secondary education
- Strong focus on academic subjects (math, science, language, history, etc.)
- Ideal if you want to keep your options open for university later

### b. HHX (Higher Commercial Examination Programme)

- Focus on business, economics, marketing, and languages
- Good if you're interested in working in finance, trade, or business

### c. HTX (Higher Technical Examination Programme)

- Emphasizes technology, natural sciences, IT, and innovation
- Perfect if you're into engineering, design, or science

### d. HF (Higher Preparatory Examination Programme)

- Shorter (2 years), more flexible
- Good if you need a second chance or want a more practical path to university or certain professions

---

## 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- Combines school with practical training in a real job (apprenticeship)
- Takes 2-5 years depending on the path
- You earn a wage during your apprenticeship
- Great if you want to become a **carpenter, electrician, mechanic, hairdresser, chef, healthcare assistant**, etc.

👉 There's also **EUX**, which combines vocational training with general upper secondary education, allowing you to go to university later.

## ✨ What to consider:

Ask yourself:

- Do I like academic subjects and want to go to university?
- Do I prefer hands-on, practical work?
- Am I interested in business, technology, design, or creative work?
- Do I want to start earning money earlier?
- Do I learn better through theory or doing?

## 🌍 Unique Strengths You Bring

Being fluent in Danish and having roots in Palau is a unique advantage! Multicultural backgrounds often open up career paths in:

- **International relations**
- **Tourism**
- **Language and culture education**
- **NGOs or development work**
- **Entrepreneurship** with global reach

## 🌐 Example Paths:

- **Want to go to university, not sure what to study yet?** → STX or HF.
- **Like business, maybe want to work internationally?** → HHX.
- **Love science or tech?** → HTX.
- **Prefer working with your hands or want to work quickly?** → EUD or EUX.
- **Still unsure?** Visit a **Studievalg** or **UU-vejledning** center (guidance counselors) – they're there to help you figure it out for free.

If you tell me more about your interests (what you enjoy doing, subjects you liked in school, or your dream job), I can give you a more personalized suggestion!
