I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Czechia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking ahead about your next step. Since you're 16 and just finished primary school in Denmark, you're likely at the point where you're choosing between different **youth education paths (ungdomsuddannelser)**. Here's a clear breakdown of your main options and what each could offer you:

## 1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're interested in academic subjects and potentially going to university later, one of the following might suit you:

- **STX (Studentereksamen)**: Broad, academic – good if you're not sure what you want to study later.
- **HHX (Higher Commercial Examination)**: Focuses on business, economics, and international topics.
- **HTX (Higher Technical Examination)**: Emphasizes science, technology, and design.
- **HF (Higher Preparatory Examination)**: A 2-year program, often used by students who want to go to university but maybe didn't follow a traditional route.

### Recommended for you if:

You enjoy theoretical subjects, like science, languages, history, economics, or technology, and want to keep university open as an option.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These programs prepare you for a specific trade (like electrician, carpenter, chef, social and health worker). They combine school with hands-on experience and apprenticeships.

### Recommended for you if:

You prefer learning by doing, want to start working sooner, or already know you enjoy a practical career path.

There's also **EUX**, which combines vocational training with subjects from the gymnasium, so you keep university as an option too.

## 3. International Possibilities

Since you have Czech roots and are fluent in Danish, you have a multicultural advantage. Later on, you could study or work abroad, or focus on international studies, languages, or EU-related jobs.

Some international options:

- International Baccalaureate (IB) – taught in English, with global recognition.
- Language-focused lines in STX or HHX that focus on European or global cultures.

---

### So, what should you consider?

Ask yourself:

- Do I enjoy studying academic subjects, or do I learn better through hands-on experience?
- Am I interested in business, science, design, health, or languages?
- Do I want to go to university later, or start working/training sooner?

---

### My Suggestion (based on what you've shared):

Since you're fluent in Danish and probably also speak Czech and possibly English, you have a great advantage in language and cultural flexibility. If you're still exploring your interests and want to keep your options open, **STX** or **HHX** would be solid paths. If you're more hands-on or want to work sooner, **EUD with EUX** could be a perfect mix.

Would you like a table comparing these paths more visually? Or do you want help finding programs in your area?
