

ChatGPT

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking about your next steps early on. Since you've just finished **primary school in Denmark** (which typically means *folkeskolen* and completing 9th or 10th grade), you're now at a key decision point in the Danish education system. Here's a breakdown of your options and some guidance to help you choose what might suit you best.

🎓 Main Educational Paths After Primary School in Denmark:

1. Gymnasium (STX, HHX, HTX, or HF)

- **Duration:** 2–3 years (usually 3)
- **Goal:** Prepares you for university or other higher education
- **Types:**
 - **STX** (General Upper Secondary): Focus on humanities, social sciences, and natural sciences.
 - **HHX** (Business): Focus on economics, marketing, business, and languages.
 - **HTX** (Technology): Focus on science, technology, and innovation.
 - **HF** (Higher Preparatory): Shorter, 2-year course; more practical; suitable if you want more flexibility.

2. EUD (Erhvervsuddannelse) – Vocational Education and Training

- **Duration:** 2–5 years depending on the trade
- **Goal:** Learn a profession (e.g., electrician, chef, hairdresser, carpenter, social and health care)
- **Includes:** Apprenticeship/workplace training
- **Great if:** You want to start working sooner or prefer hands-on learning

3. EUX – Hybrid of EUD and Gymnasium

- **Duration:** 4–5 years
- **Goal:** Combines vocational training with general upper secondary education
- **Result:** You get both a professional qualification and eligibility for university
- **Good for:** Keeping doors open for both work and further education

💡 What Should You Choose?

Since you're fluent in Danish, were raised in Denmark, and finished primary school here, you're fully integrated into the Danish system. Your next step depends on your interests, strengths, and whether you prefer academic study or hands-on learning.

Here's a way to think about it:

You like...	Then consider...
Academic subjects, theory	STX or HF
Business, marketing, economics	HHX
Tech, science, innovation	HTX
Hands-on, practical work	EUD or EUX
A mix of practical + academic	EUX

🕒 My Recommendation (Based on What You've Shared)

Since I don't yet know your interests or career goals, a **general gymnasium program (STX)** might be a strong starting point if:

- You're still exploring what you want to do.
- You're open to going to university later.
- You enjoy learning in an academic environment.

But if you already have a strong interest — like in business, tech, or a trade — it might be better to tailor your choice:

- Like business or want to run a company? → **HHX**
- Like tech, engineering, or IT? → **HTX**
- Prefer practical work or know a trade you like? → **EUD** or **EUX**

🌍 Bonus Tip (with Bolivian background)

If you're interested in international opportunities, learning **Spanish formally** could be a big asset for your future — especially in business, diplomacy, or international development. You might be fluent at home, but having it on paper (certified language skills) can boost your CV.

Would You Like Help With...?

- Choosing between specific schools in your area?
- Understanding what a typical week is like in each option?
- Matching your personal interests with a study direction?

Let me know more about what you enjoy, and I can guide you even better.
