

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Rwanda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot. Since you're 16 and just finished primary school in Denmark (which likely includes the **Folkeskole** up to 9th or 10th grade), you're now at a key decision point where you choose between several main educational paths. Here's a breakdown of your options and what might be best for you depending on your interests, strengths, and goals:

🎓 1. Gymnasium (STX, HHX, HTX, HF)

These are general upper secondary education programs that prepare you for university.

- **STX** (Alment Gymnasium): Strong in humanities, sciences, and social studies.
- **HHX** (Business Gymnasium): Focus on business, economics, and languages.
- **HTX** (Technical Gymnasium): Focus on science, technology, and innovation.
- **HF**: A shorter 2-year general program, often for students who want a faster route to specific higher education paths.

✅ Good if:

- You want to go to **university**.
- You enjoy academic subjects.
- You're not sure yet what you want to do, but want to keep options open.

🔧 2. Erhvervsuddannelser (VET – Vocational Education and Training)

Practical, job-oriented education paths that combine school and apprenticeship in a company.

Examples:

- Electrician, mechanic, hairdresser, carpenter, IT supporter, healthcare assistant.

✅ Good if:

- You want to **start working earlier**.
- You like practical work more than academic study.
- You're interested in a specific trade or job.

3. EUX – Combined Vocational + General Education

A hybrid option where you get both a vocational education and the chance to go to university.

✓ Good if:

- You want **hands-on experience** but still want the **option to study further**.
 - You're ambitious and don't mind a challenging path.
-

Recommendations Based on You:

Since you're fluent in Danish and likely bicultural, you might have **strengths in communication, languages, or cultural understanding**. That can be a huge asset!

Here are a few scenarios:

If you're academically curious and might want to go to university:

- **STX** or **HHX** would be strong choices.
 - **STX** gives you a broad education and flexibility to study anything later.
 - **HHX** is great if you're curious about business, marketing, or international trade — and maybe interested in connections between Denmark and Rwanda.
-

If you're more hands-on or want a job quickly:

- **Erhvervsuddannelse (VET)** in something practical like tech, construction, or healthcare.
 - Or go for **EUX** to keep university an option too.
-

If you're thinking about international work or giving back to your parents' country:

- A **global business** or **development studies** path via HHX or STX could help.
 - Languages (French or English), economics, and global studies are strong subjects to focus on.
-

Would you like help picking between STX, HHX, HTX, HF, EUX, or VET based on your **interests or career dreams**? If you share what you enjoy doing or subjects you're best at, I can give you a more personal recommendation.
