

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burundi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps a lot. Since you just finished primary school in Denmark (so likely 9th or 10th grade, depending on your path), you're now at an important crossroads. In Denmark, you have several good options depending on your interests, strengths, and long-term goals. Let me lay out a few realistic paths, and then we can discuss what might fit you best:

1 Gymnasium (STX, HHX, HTX, HF)

If you're thinking about possibly going to university one day, the different types of gymnasium are a very common next step:

- **STX (Almen studentereksamen)** – general academic focus: languages, science, social studies, etc. Good for broad university options.
- **HHX (Højere handelseksamen)** – business, economics, and international focus. Great if you're interested in business, marketing, trade.
- **HTX (Højere teknisk eksamen)** – technical and science focus. Ideal if you like technology, IT, or engineering.
- **HF (Højere forberedelseksamen)** – shorter, more practical, easier access to certain professions (nursing, teaching, etc.).

👉 *Best if you enjoy studying, want to keep doors open, and maybe consider university later.*

2 EUD (Erhvervsuddannelse) – Vocational Education and Training

If you want to learn a profession more practically and maybe start earning sooner, Denmark has strong vocational programs:

- Examples: electrician, carpenter, hairdresser, chef, healthcare worker, IT support, etc.
- You combine school and internships (praktikplads).

👉 *Best if you like hands-on learning, want a skilled trade, or want to enter the job market earlier.*

3 EUX (Erhvervsfaglig studentereksamen) – Combination of vocational and academic

- Mixes vocational training with academic studies.

- Gives you both a skilled trade *and* the option for further education later.

👉 *Best if you want a skilled trade but still want the option to go to university later.*

4 International or Specialized Schools

Given your background and fluency in Danish (and possibly other languages), you might also consider:

- International Baccalaureate (IB)
- Private or specialized schools with international focus.

👉 *Best if you're strong in English, thinking internationally, or might want to study/work abroad.*

A Few Personal Questions (if you're okay answering):

- What subjects do you enjoy most?
 - Do you see yourself more in academic studies or practical work?
 - Are you thinking more about university or getting a profession earlier?
 - Do you have any interests already (technology, healthcare, business, etc.)?
-

👉 If you tell me a little more, I can give you a much more personalized recommendation. Shall we?
