I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Micronesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school — congratulations! At 16 in Denmark, you're at an important crossroads where your next educational step can shape your future. Since you're fluent in Danish and have a unique cultural background, you have a solid foundation and valuable perspective.

Here's a breakdown of your main options in the Danish education system after primary school (folkeskole), along with some recommendations depending on your interests and goals:

## 🎓 Main Educational Paths in Denmark After Primary School

### 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are typically 3-year programs that prepare you for university:

- **STX (Almen studentereksamen)** – General upper secondary school. Broad academic subjects (math, languages, science, humanities).
- **HHX (Højere handelseksamen)** – Business-oriented. Focus on economics, marketing, and international business.
- **HTX (Højere teknisk eksamen)** – Technical and science-oriented. Great if you're into tech, engineering, or natural sciences.
- **HF (Højere forberedelseseksamen)** – 2-year program for students who prefer a shorter and more practical academic path.

✅ *Recommended if you want to go to university later and enjoy academic work.*

### 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- These are practical education paths that combine school with apprenticeship.
- Examples: Electrician, carpenter, healthcare assistant, chef, mechanic, IT technician.

✅ *Great if you want to start working earlier, like hands-on learning, and maybe don't plan on university (though it's still possible later).*

### 3. Kombinerede forløb (EUX)

- A combination of vocational education and general upper secondary education.

- You get both a vocational qualification **and** the option to study at university later.

✓ *Recommended if you're interested in both practical skills and want to keep your options open for higher education.*

## 💡 What to Consider

Ask yourself:

- Do I enjoy academic subjects and learning in a classroom?
- Am I more hands-on and prefer learning by doing?
- What are my interests? (Tech, health, business, arts, social work, etc.)
- Do I want to work soon, or study more?

## 🌐 Bonus: Your Micronesian Background

You might be in a unique position to explore international or multicultural education and careers. If you're interested in global development, languages, or working abroad, a general education path (like STX or HHX) could help you pursue university studies in those areas.

## 👍 Recommendations Based on Common Interests

Interest	Path	Notes
Academic subjects, university later	<b>STX or HF</b>	STX is broader, HF is shorter
Business, marketing, international trade	<b>HHX</b>	Good if you like business
Science, IT, tech	<b>HTX</b>	Great for future engineering or tech studies
Hands-on work, skilled trade	<b>EUD</b>	Lots of job opportunities
Combo of hands-on + academic	<b>EUX</b>	Keeps many doors open

If you'd like, I can help you figure out which specific programs or schools in your area fit your interests — just let me know what you're into!
